the sociological tradition arguably the definitive work of its kind aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Émile durkheim who continued auguste comte s quest for a science of society and a scientific validation of morality vilfredo pareto the italian neo machiavellian who emphasized the oligarchic or elitist character of all societies and the german sociologist max weber who reflected critically on the prospects for human freedom in an age marked by bureaucratization and rationalization aron presents rich portraits of these three thinkers drawing out the enduring insights that remain in their work at the same time he reflects critically on durkheim s project for a science of society pareto s critique of humanitarianism and weber s tragic pessimism above all the book is remarkable for demonstrating aron s lifelong indebtedness to and divergence from the thought of max weber the sociologist par literature religion sociology and the history of ideas presents unabridged works and substantive abridgments in preeminent translations along with balanced lucid sophisticated introductions this book includes a wide and balanced

selection of many of the more important texts of modern political thought to its great credit it provides pertinent excerpts from frequently neglected authors such as calvin and hume which it nicely juxtaposes appear to be good and the introductions to each section help to situate the writers in their historical and intellectual context and to alert students to some of the central issues that arise in the texts this book offers an economical and useful approach to modern political thought an excerpt from the beginning of the first chapter the neglect of thinking every man knows there are evils in the world which need setting right every man has pretty definite ideas as to what these evils are but to most men one in particular stands out vividly to some in fact this stands out with such startling vividness that they lose sight of other evils or look upon them as the natural consequences of their own particular evil in chief to the socialist this evil is the capitalistic system to the prohibitionist it is intemperance to the feminist it is the subjection of women to the clergyman it is the decline of religion to andrew carnegie it is war to the staunch republican it is the democratic party and so on ad infinitum i too have a pet little evil to which in more passionate moments i am apt to attribute all the others this evil is the neglect of thinking and when i say thinking i mean real thinking independent thinking hard thinking you protest you say men are thinking more now than they ever were you bring out the almanac to prove by statistics that illiteracy is declining you point to our magnificent libraries you point to the multiplication of books you show beyond a doubt that people are reading more now than ever before in all history very well exactly that is just the trouble most people when confronted with a problem immediately acquire an inordinate desire to read up on it when they get stuck mentally the first thing such people do is to run to a book confess it have you not often been in a waiting room or a pullman noticed people all about you reading and finding yourself without any reading matter have you not wished that you had some something to occupy your mind and did it ever occur to you that you had within you the power to occupy your mind and do it more profitably than all those assiduous readers briefly did it ever occur to you to think argues that a psychological wound occurring when infant males separate from their mother s love leaves men vulnerable to personal insensitivity and misogyny yves charles zarka shows you how hobbes established the framework for modern political thought discover the origin of liberalism in the hobbesian theory of negative liberty that hobbesian interest and contract are essential to contemporary discussions of the comportment of economic actors and how state sovereignty returns anew in the form of the servility of the state at the same time zarka controversially argues against received readings claiming that hobbes is a thinker of a state monopoly on legitimate violence
