oleg d jefimenko wikipedia Jan 09 2024 jefimenko worked on the generalization of newton s gravitational theory to time dependent systems in his opinion there is no objective reason for abandoning newton s force field gravitational theory in favor of a metric gravitational theory

jefimenko west virginia university Dec 08 2023 the fundamental equations of the generalized newton s theory are causal gravitational equations expressing time dependent gravitational and cogravitational fields in the form of retarded integrals for time independent systems these equations reduce to the conventional equations of the original newton s theory

there are two important theories in classical physics which have not
been properly developed to their logical and mathematical conclusion
gravitoelectromagnetism wikipedia Jul 03 2023 the main consequence of
the gravitomagnetic field or velocity dependent acceleration is that a
moving object near a massive non axisymmetric rotating object will
experience acceleration not predicted by a purely newtonian
gravitoelectric gravity field more subtle predictions such as induced
rotation of a falling object and precession of
