spyder is a free and open source scientific environment written in python for python and designed by and for scientists engineers and data analysts spyder is a powerful scientific environment written in python for python and designed by and for scientists engineers and data analysts it features a unique combination of the advanced editing analysis debugging and profiling functionality of a comprehensive development tool with the data exploration interactive execution deep discover everything you need to know about spyder the python integrated development environment ide tailored for data science tasks learn about its features capabilities and how it facilitates efficient coding debugging and analysis in the data science workflow computer science degree programs on coursera feature hands on learning peer to peer support and the same professors that teach degree courses on campus earn your computer science degree or engineering degree online from top computer science schools like arizona state university university of illinois and university of london data science is an ever evolving field using algorithms and scientific methods to parse complex data sets data scientists use a range of programming languages such as python and r to harness and analyze data this course focuses on using python in data science by the end of the course you ll have a fundamental understanding of machine spyder students capstone design undergraduate and graduate students graduates finding employment within six months of graduating faculty members have won national science foundation career awards k median starting salary of graduates with bs degree increase in research funding in past five years undergraduate and graduate students in chemical engineering and polymer and materials engineering and science it will also prove invaluable for industry professionals as a fundamental polymer processing analysis and synthesis reference many machine learning engineering jobs require a bachelor s degree at a minimum so beginning a course of study in computer science or a closely related field such as statistics is a good first step 2 gain entry level work experience
