el alamein was one of the pivotal battles of the second world war fought by armies and air forces on the cutting edge of military technology yet alamein has always had a patchy reputation with many commentators willing to knock its importance this book explains just why el alamein is such a controversial battle based on an intensive reading of the contemporary sources in particular the extensive and recently declassified british bugging of axis prisoners of war military historian simon ball turns alamein on its head explaining it as a cultural defeat for britain alamein is a military history of the battle showing how different it looks stripped of later cultural excrescences but it also shows how alamein culture saturated the post war world when archival sources mingled with film novels magazines popular histories and the rest of alamein s footprint whether you are interested in the battle itself or its cultural afterlife if you have an opinion about alamein you ll question it after reading this book

underhand and damned un english was the view of submarines in edwardian britain yet by the 1960s the new nuclear powered submarines were seen by the royal navy as being the hallmark of a first class navy in this book duncan redford a retired royal navy submarine officer explores how and why attitudes to the submarine changed in britain between 1900 and 1977 using a wide array of previously unpublished sources redford sheds light on what the british thought about submarines both their own and those that were used against them rather than providing an operational history of britain s submarines this book looks at naval and civilian conceptions of what submarine warfare was imagined to be like in the context of unrestricted submarine warfare the world wars and the development of nuclear weaponry with chapters on the coronation and jubilee reviews at spithead the submarine in novels and films as well as coverage of the royal navy s and civilian views of submarines and submarine warfare this book gives a comprehensive view of the british regard or lack of it for the submarine through the examination of the british relationship with submarines since 1900 it is possible to see changing patterns in acceptance and tensions between different sub cultures both civil and maritime since 1900 the meaning constructed around submarines has changed as the submarine has progressed along a road from perdition as the weapon of the weaker power and morally weaker power too to a form of redemption as a major capital unit this book will be essential for naval historians students and those interested in aspects of submarine development and use
