1961

multistate guide to sales and use taxation construction provides guidance to construction contractors for dealing with the difficult sales and use tax issues inherent in their businesses particularly if they operate in several states in addition to the usual problems in complying with different bodies of law administering a hodge podge of state and local tax rates and dealing with a variety of tax agency audit programs the contract

process and insufficient recordkeeping further complicate an already complicated task

Janitorial Service Training Guide

2011-10-12

safety is a word that has many connotations of risk of a possible accident that is acceptable conjuring up different meanings to different people. What is safety? A scientist views safety differently than a person who skydives. A manufacturer looks at safety differently than a mountain climber. A lawyer looks at safety differently than a legislator. Safety is a necessary factor in the design of an experiment and in the development of a manufacturing process. A legislator is likely to see safety as an important part of an environmental law. A government administrator may consider safety issues in terms of minimizing risks so that they decrease to acceptable levels. We can do this by identifying sources of hazards and by assessing the consequences of accidents inherent to these hazards. An attorney may base a negligence suit on safety defects.
