almost forgotten until his papers were discovered in a chicago attic richard greener was a pioneer who broke educational and professional barriers for black citizens he was also a man caught between worlds richard theodore greener 1844 1922 was a renowned black activist and scholar in 1870 he was the first black graduate of harvard college during reconstruction he was the first black faculty member at a southern white college the university of south carolina he was even the first black us diplomat to a white country serving in vladivostok russia a notable speaker and writer for racial equality he also served as a dean of the howard university school of law and as the administrative head of the ulysses s grant monument association yet he died in obscurity his name barely remembered his black friends and colleagues often looked askance at the light skinned greener's ease

among whites and sometimes wrongfully accused him of trying to pass while he was overseas on a diplomatic mission greener's wife and five children stayed in new york city changed their names and vanished into white society greener never saw them again at a time when americans viewed themselves simply as either white or not greener lost not only his family but also his sense of clarity about race richard greener's story demonstrates the human realities of racial politics throughout the fight for abolition the struggle for equal rights and the backslide into legal segregation katherine reynolds chaddock has written a long overdue narrative biography about a man fascinating in his own right who also exemplified america's discomfiting perspectives on race and skin color uncompromising activist is a lively tale that will interest anyone curious about the human elements of the equal rights struggle

this volume is the first attempt to assess the impact of both humanism and protestantism on the education offered to a wide range of adolescents in the hundreds of grammar schools operating in england between the reformation and the enlightenment by placing that education in the context of lutheran calvinist and jesuit education abroad it offers an overview of the uses to which latin and greek were put in english schools and identifies the strategies devised by clergy and laity in england for coping with the tensions between classical studies and protestant doctrine it also offers a reassessment of the role of the godly in english education and demonstrates the many ways in which a classical education came to be combined with close support for the english crown and established church one of the major sources used is the school textbooks which were incorporated into the english stock set up by leading members of the stationers company of london and reproduced in hundreds of thousands of copies during the seventeenth and eighteenth centuries although the core of classical education remained essentially the same for two centuries there was a growing gulf between the methods by which classics were taught in elite institutions such as winchester and westminster and in the many town and country grammar schools in which translations or bilingual versions of many classical texts were given to weaker students the success of these new translations probably encouraged editors and publishers to offer those adults who had received little or no classical education new versions of works by aesop cicero ovid virgil seneca and caesar this fascination with ancient greece and rome left its mark not only on the lifestyle and literary tastes of the educated elite but also reinforced the strongly moralistic outlook of many of the english laity who equated virtue and good works with pleasing god and meriting salvation
