global context volume ii engages with philosophy science art and architecture music and the enlightenment and examines the military and political developments within and beyond the boundaries of europe by collectively concentrating on the theme of political symbolism in modern europe the contributors to this volume have chosen to honor a revered teacher and colleague by developing a set of variations on one of his primary scholarly concerns the essays deal with familiar domains in the history of european culture religion science philosophy theater popular culture and social ideologies they attempt to focus on their individual subjects as studies of the ways in which the terms of cultural discourse have been shaped and elaborated by social position and the inherently political nature of such discourse the essays also trace attempts to capture assent or compliance to particular world views which have had profound cultural and political consequences many essays deal with the vocabularies of strategically located elites consciously or unconsciously shaping discourse to enhance their role in the european social hierarchy others turn to the problem of the dynamics of symbolic reception and reception by popular audiences a third group of thematic essays deals with case studies of world views dominated by political metaphors of group identity and differentiation which became dominant in western europe toward the end of the nineteenth century class nation sex age and race the essays in the volume deal with george mosse and political symbolism the medical model of cultural crisis in fin de siècle france cultural uses of fatigue in the nineteenth century marxism neo kantian thought and german popular culture the ostjude as a cultural symbol in german anti semitism the function of myth and symbol in georges sorel feminism and eugenics in edwardian england darwinism and the working class in germany science and religion in early modern europe popular struggle for stability this volume returns to the fundamental questions raised by the long running discussion what continent wide patterns of change can be discerned in european history across the centuries from the renaissance to the french revolution what were the causes of the revolts that rocked so many countries between 1640 and 1660 did fundamental changes occur in the relationship between politics and religion politics and military technology politics and the structures of intellectual authority handy affordable and accessible this book covers the history of europe since the late middle ages without overwhelming readers with unnecessary details focusing on the great events personalities and ideas that shaped europe s development the book s compact size and classroom style notes make it perfect for quick and easy reference and review religion in modern europe examines religion as a form of collective memory this is a memory held in place by europe s institutional churches educational systems and the mass media all of which are themselves responding to rapid social and economic change europe s religious memory is approached in the following ways as vicarious a particularly european characteristic as precarious especially among young people and as it is portrayed by the media the memory may fragment be disputed and in extreme cases disappear alternatives may emerge the challenge for european societies is to affirm healthy mutations in religious memory and discourage others the book also examines the increasing diversity of europe s religious life european societies series series editor colin crouch very few of the existing sociological texts which compare different european societies on specific topics are accessible to a broad range of scholars and students the european societies series will help fill this gap in the literature and attempt to answer questions such as is there really such a thing as a european model of society do the economic and political integration processes of the european union also imply convergence in more general aspects of social life like family or religious behaviour what do the societies of western europe have in common with those further to the east this series will cover the main social institutions although not every author will cover the full range of european countries as well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent interpreting
