it is not difficult to argue that the social sciences are in a period of transition our day to day lives have been marked by uncertainty as our social lives have vacillated wildly between highs and lows tensions between fellow citizens have heightened along ideological fault lines and educators have been placed squarely at the center of public discourses about what and how we should be teaching by any measure we are living in a time where every moment seems to be rife with high stakes realities that must be navigated ladson billings 2020 called on educators to reimagine education and contest the notion of a return to normal in the current highly polarized context where we see multiple competing narratives rather than promoting a return to normal or business as usual approach we argue that educators must use the lessons of the last two years as well as draw on what we have learned from history and the social sciences by asking ourselves how we might interrogate and inform current social landscapes and the challenges that arise from them we have the opportunity to take leadership in fostering innovation building solidarity and re imagining the teaching and learning of history and the social sciences we recognize that humans live in multiple complex communities that include intersectional identities relationships with power agency and discourses and lived realities that are as unique as they are divergent consequently the task of educators and the goal of this volume is to provide a clarion voice to a dynamic relational and undeniably human social world
