darwinism and reflecting ignorance of biology biological essentialism argues that the demands of biological explanation show that the metaphysicians are right the positive view of the consensus is that the essences are wholly relational taxa must have certain histories biological essentialism argues that there is indeed an historical component to the essence but this component presupposes an intrinsic component its second issue concerns the essences of biological individuals metaphysicians have had much to say about this again on the basis of intuitions many hold that an individual is essentially a member of its species this has recently been unequivocally rejected by philosophers of biology biological essentialism appeals to biological explanation again to argue for essential membership furthermore to argue for the kripkean view that an organism's essence is partly intrinsic and partly relational a matter of origin finally the book addresses the lively contemporary issue of whether race is biologically real from the perspective developed earlier the book argues that there are indeed racial kinds in some sense that are in the realm of the biological these kinds also have partly historical and partly intrinsic underlying essences

2022-08-05 the concept of likeness to truth like that of truth itself is fundamental to a realist conception of inquiry to demonstrate this we need only make two rather modest aim of an inquiry as an inquiry is realist assumptions the truth doctrine that the the truth of some matter and the progress doctrine that one false theory may realise this aim better than another together these yield the conclusion that a false theory may be more truthlike or closer to the truth than another it is the aim of this book to give a rigorous philosophical analysis of the concept of likeness to truth and to examine the consequences some of them no doubt surprising to those who have been unduly impressed by the admittedly important true false dichotomy truthlikeness is not only a requirement of a particular philosophical outlook it is as deeply embedded in common sense as the concept of truth everyone seems to be capable of grading various propositions in different hypothetical situations according to their closeness to the truth in those situations and if my experience is anything to go by there is remarkable unanimity on these pretheoretical judge ments this is not proof that there is a single coherent concept underlying these judgements the whole point of engaging in philosophical analysis is to make this claim plausible

Utilizing the 3Ms of Process Improvement 2010-05-24 this is the first part of paul tillich s three volume systematic theology one of the most profound statements of the christian message ever composed and the summation and definitive presentation of the theology of the most influential and creative american theologian of the twentieth century in this path breaking volume tillich presents the basic method and statement of his system his famous correlation of man s deepest questions with theological answers here the focus is on the concepts of being and reason tillich shows how the quest for revelation is integral to reason itself in the same way a description of the inner tensions of being leads to the recognition that the quest for god is implied in finite being here also tillich defines his thought in relation to philosophy and the bible and sets forth his famous doctrine of god as the ground of being thus god is understood not as a being existing beside other beings but as being itself or the power of being in everything god cannot be made into an object religious knowledge is therefore necessarily symbolic
