genre it includes a wide range of films from canonical sf such as le voyage dans la lune star wars and blade runner to films that stretch and reshape the definition of the genre this expansion of generic focus offers an innovative approach for students and fans of science fiction alike prewriting your screenplay cements all the bricks of a story s foundations together and forms a single organic story growing technique starting with a blank slate it shows writers how to design each element so that they perfectly interlock together like pieces of a puzzle creating a stronger story foundation that does not leave gaps and holes for readers to find this construction process is performed one piece at a time one character at a time building and incorporating each element into the whole the book provides a clear cut set of lessons that teaches how to construct that story base around concepts as individual as the writer s personal opinions helping to foster an individual writer s voice it also features end of chapter exercises that offer step by step guidance in applying each lesson providing screenwriters with a concrete approach to building a strong foundation for a screenplay this is the quintessential book for all writers taking their first steps towards developing a screenplay from nothing getting them over that first monumental hump resulting in a well formulated story concept that is cohesive and professional

icc handbook of 21st century cereal science and technology highlights the importance of cereals presenting insights into the foundational structure of cereal grains including potential contamination factors that can negatively impact cereal and grain yield focusing on the eight major cereal crops wheat maize rice barley sorghum and millets oats rye and pseudocereals this is the only available reference to provide standardized coverage for detailed comparison written by a global team of expert editors and contributors the book provides practical insights into the utilization of cereals grains and safety assessments this international association for cereal science and technology endorsed volume continues their commitment to international cooperation through the dissemination of knowledge conducting research and developing standard methods provides standardized insights into cereals their grains profiles and uses includes the 8 most utilized cereals including pseudocereals promotes understanding of the real world use options of cereals popular science gives our readers the information and tools to improve their technology and their world the core belief that science and technology are the driving forces that will help make it better communicating science and technology is a high priority of many research and policy institutions a concern of many other private and public bodies and an established subject of training and education over the past few decades the field has developed and expanded significantly both in terms of professional practice and in terms of research and reflection the routledge handbook of public communication of science and technology provides a state of the art review of this fast growing and increasingly important area through an examination of the research on the main actors issues and arenas involved in this brand new revised edition the book brings the reviews up to date and deepens the analysis as well as substantial reworking of many chapters it gives more attention to digital media and the global aspects of science communication with the inclusion of four new chapters several new contributors are added to

leading mass communication scholars sociologists public relations practitioners science writers and others featured herein with key questions for further discussion highlighted in each chapter the handbook is a student friendly resource and its scope and expert contributors mean it is also ideal for both practitioners and professionals working in the field combining the perspectives of different disciplines and of different geographical and cultural contexts this original text provides an interdisciplinary and global approach to the public communication of science and technology it is a valuable resource for students researchers educators and professionals in media and journalism sociology the history of science and science and technology take a trip beyond this earth to explore the myths of the mandalorian and uncover the anatomy of the newest space western in the star wars universe star wars dominates the film world the combined box office revenue of the star wars movies equates to over 10 billion making it the second highest grossing film franchise of all time but this franchise is no blaster from the past its fantastically successful films have now been followed by multiple television series set in that same galaxy far far away the franchise s flagship television series and likely the firmest fan favorite for some time to come is the mandalorian tracing the tale of the titular bounty hunter traveling across the furthest reaches of that mythic galaxy the mandalorian has been greatly praised and highly acclaimed for creating characters with gravitas and originality worlds with depth and impact resulting in some of the best star wars content ever even though it s set in deep space the mandalorian has as much in common with western movies as it does with science fiction saloons bandits gun duels bounty hunters outlaws with a price on their heads space exploration as a final frontier and a wild hero who doesn t quite belong in a lawless part of the galaxy after the fall of the empire the science of the mandalorian takes you on a badass journey with a mysterious lone gunfighter in the outer reaches of the galaxy where your beskar armor will protect you from many things but not the sight of a small green carnivorous humanoid with big black eyes and mysterious powers this is the way

between 1945 and 1970 canada s department of national defence sponsored scientific research into the myriad challenges of military operations in cold regions to understand and overcome the impediments of the country s cold climate scientists studied cold weather acclimatization hypothermia frostbite and psychological morale for soldiers assigned to active duty in northern canada frontier science investigates the history of military science in northern canada during this period of the cold war highlighting the consequences of government funded research for humans and nature alike the book reveals how under the guise of environmental protection research the canadian military sprayed pesticides to clear bushed areas used radioactive substances to investigate vector borne diseases pursued race based theories of cold tolerance and enabled wide ranging tests of newly developed weapons and equipment in arguing that military research in northern canada was a product of the cold war matthew s wiseman tackles questions of government power scientific authority and medical and environmental research ethics based on a long and deep pursuit of declassified records archival sources and oral testimony frontier science is a fascinating new history of military approaches to the human nature relationship five minute science fiction stories for kids sci fi

stories for young explorers invites young readers to journey through captivating tales of imagination and wonder within these pages you ll meet intrepid young adventurers brave young inventors and imaginative young minds all exploring the limitless possibilities of the universe these science fiction stories are crafted to spark curiosity empathy and the boundless potential within every child they ll transport young explorers to distant planets introduce them to time traveling inventors and immerse them in the creative world of robots aliens and futuristic technology as the young protagonists navigate thrilling adventures readers will learn valuable lessons about friendship creativity and the beauty of embracing one s uniqueness the stories demonstrate the power of connection knowledge sharing and the ability to work together to create a brighter harmonious future perfect for bedtime or quick moments of adventure each story can be enjoyed in just five minutes with vibrant storytelling five minute science fiction stories for kids is not only a gateway to endless imagination but also a source of inspiration for young minds encouraging them to explore the wonders of the universe and the depths of their own creativity this collection of science fiction stories is a world of possibilities waiting to be discovered by young readers whether they dream of becoming young inventors intrepid explorers or imaginative storytellers this book is an invitation to embark on exciting journeys ignite curiosity and celebrate the marvels of science fiction open the cover and let your young explorers set out on thrilling adventures within the pages of five minute science fiction stories for kids the future is bright and the universe is theirs to explore this enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998 for each director there is a complete filmography including television work a career summary a critical assessment and behind the scenes production information seventy nine directors are covered in especially lengthy entries and a short history of the science fiction film genre is also included here is the essential how to guide for communicating scientific research and discoveries online ideal for journalists researchers and public information officers looking to reach a wide lay audience drawing on the cumulative experience of twenty seven of the greatest minds in scientific communication this invaluable handbook targets the specific questions and concerns of the scientific community offering help in a wide range of digital areas including blogging creating podcasts tweeting and more with step by step guidance and one stop expertise this is the book every scientist science writer and practitioner needs to approach the wild west of the with knowledge and confidence the nature of scientific activity has changed dramatically over the last half century and the objectivity and rigorous search for evidence that once defined it are being abandoned increasingly this text argues dogma has taken the place of authentic science this study examines how conflicts of interest both institutional and individual have become pervasive in the science world and also explores the troubling state of research funding and flaws of the peer review process it looks in depth at the dominance of several specific theories including the big bang cosmology human caused global warming hiv as a cause of aids and the efficacy of anti depressant drugs in a scientific environment where distinguished experts who hold contrary views are shunned

this book is an important contribution to the examination of scientific heterodoxies greenberg explores how scientific research is funded in the united states including why the political process distributes the funds the way it does and how it can be corrupted by special interests in academia business and political machines the study of terminology has always occupied a unique place in the field of specialized language research its object the terminology of various domains encompasses more than just the descriptive linguistic level of lexicology and its application specialized lexicography morphology syntax and the textual level as well as the role of culture in communication are all fields in which terminology has its specific functions and potential in the history of the discipline several centers for the research and instruction of terminology emerged however the study of terminology in russia has been largely overlooked by its european neighbors the time has come to offer an in depth look into the research being performed and to demonstrate the vitality of the current research landscape today s terminology research in russia makes a lasting balanced impression in this diverse and wide ranging volume which presents many ideas for further research by examining important aspects of science fiction in the twentieth century this book explains how the genre evolved to its current state close critical attention is given to topics including the art that has accompanied science fiction the subgenres of space opera and hard science fiction the rise of sf anthologies and the burgeoning impact of the marketplace on authors included are in depth studies of key texts that contributed to science fiction s growth including philip francis nowlan s first buck rogers story the first published stories of a e van vogt and the early juveniles of isaac asimov arthur c clarke and robert heinlein the history of science is littered with mad bad and delightfully dotty inventions from the bicycle that relied for its momentum on the rider wagging his head back and forth continually to the improved pneumatic advertising hat a bowler that hurled a lit up billboard into the air at the touch of a button or the suitcase that turned into a small boat for the nervous ferry passenger here is the chance to sample among other delights professor ray s nose adjusting machine admiral popov s circular warship the perfect sleeping partner a japanese pillow shaped just like a man with an arm fitted at the right angle for a comforting cuddle and last but by no means least calantarient s improved dung trap for carriage horses employed by ladies of fashion and those of a delicate constitution this collection of essays provides the first systematic and multidisciplinary analysis of the role of gender in the formation and dissemination of the american social sciences in the late nineteenth and early twentieth centuries other books have traced the history of academic social science without paying attention to gender or have described women s social activism while ignoring its relation to the production of new social knowledge in contrast this volume draws long overdue attention to the ways in which changing gender relations shaped the development and organization of the new social knowledge and it challenges the privileged position that academic and mostly male social science has been granted in traditional histories by showing how women produced and popularized new forms of social knowledge in such places as settlement houses and the russell sage foundation the book s varied perspectives building on recent work in history and feminist theory break from

the traditional view of the social sciences as objective bodies of expert knowledge contributors examine new forms of social knowledge rather as discourses about gender relations and as methods of cultural critique the book will create a new framework for understanding the development of both social science and the history of gender relations in the united states the contributors are greg alchon nancy berlage desley deacon mary dietz james farr nancy folbre kathryn kish sklar dorothy ross helene silverberg and kamala visweswaran of all the inventions of the nineteenth century the scientist is one of the most striking in revolutionary france the science student taught by men active in research was born and a generation later the graduate student doing a phd emerged in germany in 1833 the word scientist was coined forty years later science increasingly specialised was becoming a profession men of science rivalled clerics and critics as sages they were honoured as national treasures and buried in state funerals their new ideas invigorated the life of the mind peripatetic congresses great exhibitions museums technical colleges and laboratories blossomed and new industries based on chemistry and electricity brought prosperity and power economic and military eighteenth century steam engines preceded understanding of the physics underlying them but electric telegraphs and motors were applied science based upon painstaking interpretation of nature the ideas discoveries and inventions of scientists transformed the world lives were longer and healthier cities and empires grew societies became urban rather than agrarian the local became global and by the opening years of the twentieth century science was spreading beyond europe and north america and women were beginning to be visible in the ranks of scientists bringing together the people events and discoveries of this exciting period into a lively narrative this book will be essential reading both for students of the history of science and for anyone interested in the foundations of the world as we know it today a welcome overview of black superheroes and afrocentric treatments of black white relations in us superhero comics since the 1960s imagetext journal winner american book award before columbus foundation super black places the appearance of black superheroes alongside broad and sweeping cultural trends in american politics and pop culture which reveals how black superheroes are not disposable pop products but rather a fascinating racial phenomenon through which futuristic expressions and fantastic visions of black racial identity and symbolic political meaning are presented adilifu nama sees the value and finds new avenues for exploring racial identity in black superheroes who are often dismissed as sidekicks imitators of established white heroes or are accused of having no role outside of blaxploitation film contexts nama examines seminal black comic book superheroes such as black panther black lightning storm luke cage blade the falcon nubia and others some of whom also appear on the small and large screens as well as how the imaginary black superhero has come to life in the image of president barack obama super black explores how black superheroes are a powerful source of racial meaning narrative and imagination in american society that express a myriad of racial assumptions political perspectives and fantastic re imaginings of black identity the book also demonstrates how these figures overtly represent or implicitly signify social discourse and accepted wisdom concerning notions of racial reciprocity equality forgiveness and

ultimately racial justice a refreshingly nuanced approach nama complicates the black superhero by also seeing the ways that they put issues of post colonialism race poverty and identity struggles front and center rain taxi this collection of essays examines the contribution of british plays to key social political and intellectual debates since 2000 it explores some of the most pressing concerns that have dominated the public discourse in britain in the last decade focusing on their representation in dramatic texts each essay provides an in depth analysis of one play assessing its particular contribution to the debate in question the book aims to show how contemporary drama has developed unique ways to present the complexities and ambiguities of certain issues with aesthetic as well as emotional appeal twenty eight terrific interviews with some of the sharpest and most talkative stars and movie makers of the classic and c r a z y sf and horror films of the past richard matheson janet leigh acquanetta hazel court kim hunter and others reminisce at length and with great good humor about their days on the sets of psycho planet of the apes superman the poe hammer and lewton films and exploitation greats like attack of the 50 foot woman this book examines science fiction s theoretical and ontological backgrounds and how science fiction applies to the future of tourism it recreates and invents the future of tourism in a creative and disruptive manner reconceptualising tourism through alternative and quantum leap thinking that go beyond the normative or accepted view of tourism the chapters focusing on areas such as disruption sustainability and technology draw readers into the unknown future of tourism a future that may be disruptive dystopian or utopian the book brings a new theoretical paradigm to the study of tourism in a post covid 19 world and can be used to explore frame and even form the future of tourism it will capture the imagination and inspire readers to address tourism s challenges of tomorrow in an era when many in the science community feel that science is under attack in defense of science explains why ordinary citizens need to have an understanding of science its methods and its groundbreaking discoveries the authors debunk several misconceptions of science and scientists and advocate that science is an integral part of society and everyday life this book begins with an introduction to science and its basic concepts including a brief and entertaining history of science and scientific discoveries before taking on current views of science in society it surveys the many sources of our ideas of science including pop culture classics of literature news media and political discourse much of the information from these sources tends to mislead and the only way to guard against such misinformation is to become scientifically literate and promote scientific literacy in society the book therefore delves into the reasons that so many people do not understand basic scientific principles and do not keep up with scientific breakthroughs and finishes by examining the current state of science education it includes many resources for further reading and is presented in an engaging and entertaining way fugitive science excavates this story uncovering the dynamic scientific engagements and experiments of african american writers performers and other cultural producers who mobilized natural science and produced alternative knowledges in the quest for and name of freedom literary and cultural critics have a particularly important role to play in uncovering the history of fugitive science since these engagements and experiments often

happened not in the laboratory or the university but in print on stage in the garden church parlor and in other cultural spaces and productions routinely excluded from the official spaces of scientific learning and training black cultural actors transformed the spaces of the everyday into laboratories of knowledge and experimentation introduction battle the growing arthritis epidemic by taking steps now arthritis is truly an epidemic more than 40 million americans currently have arthritis it is the leading cause of disability among people age 65 and older and the overall annual costs to society are figured to be more than 65 billion while it is present in nearly everyone by age 70 the problem is growing as arthritis more commonly appears in people as young as their 30s but there is good news while you can t cure arthritis you can stave it off or manage it and dramatically improve your life the new science of overcoming arthritis offers a plan for anyone who wants to prevent or reverse their pain discomfort and limitations it is the first book on arthritis that incorporates the latest research and treatment strategies for a disease that the vast majority of baby boomers will inevitably have to learn to live with what s more it provides younger generations with an easy to follow game plan for minimizing and even avoiding the more debilitating aspects of arthritis it answers the most pressing questions including why do we get arthritis which arthritis supplements are worthwhile what are the best arthritis exercise and diet strategies which alternative therapies are sensible and safe what is the latest science about stem cells and future therapies involving our genes and biology dr vangness a seasoned surgeon and team physician for usc athletics specializes in sports injuries and is a medical advisor on the cutting edge of arthritis research he provides practical advice culled from his years working with star collegiate athletes who are often on the front line in uncovering the best practices for dealing with injuries and the deterioration of the body s joints while genetics play a large role in determining who will suffer from arthritis and even how severely there are strategies for staying active pain free and healthy no matter who you are first published in 1996 this work covers all the major sectors of policing in the united states political events such as the terrorist attacks of september 11 2001 have created new policing needs while affecting public opinion about law enforcement this third edition of the encyclopedia examines the theoretical and practical aspects of law enforcement discussing past and present practices first published in 2011 routledge is an imprint of taylor francis an informa company with the first online discussions of space 1999 starting in january 1993 this book celebrates the 25th anniversary of online alpha it is edited and told from the perspective of trying to present different types of discussions over the years by focusing on humour insight surprise and shared community there is also a focus on how the discussions have changed and how they continue to change the book is written on an idealistic basis it is sold at the lowest price the publisher was willing to accept a free e book version can be downloaded at lulu com from the next generation and the x files to farscape and enterprise sci fi television series in the us have multiplied since the 1980s jan johnson smith shows how in line with national political upheavals this vibrant and perplexing genre set about expanding the myth of the western frontier into deep space she looks at the sense of wonder or sublime that

infuses much frontier art and science fiction and traces a possible historical precedent to the genre in the fabulous and heroic journeys of the classical epic she discusses narrative styles and their influences from the overarching narrative of babylon 5 to the episodic formula of the outer limits considers how experimental series such as twin peaks challenge conventional structures and how and why sci fi television has adopted new technologies she also explores the juxtaposition of arcane language and technological jargon in modern american sci fi television revealing the extraordinarily alien yet curiously familiar arena it creates for the contemporary film audience science fiction has become a key locus for displaying and imaginatively addressing its most pressing concerns those concerns increasingly surface not just as displaced subjects injected into conventional sf narratives but as inflections in the very nature of the genre we might describe these issues that bulk so large in our everyday world as angling into the world of science and technology becoming a kind of slant presence in the genre and in the process altering the thrust of our sf films and other screen media resulting in what seems like a proliferation of sub genre labels that mark off a substantially new group of sf cinemas these cinemas challenge us to view or read them differently from perspectives that are just coming into focus through an introductory overview and series of articles on various of these contemporary slants and the theories that drive them this volume offers a guide to both what the new sf cinemas are about and how we have come to think about or read them differently in the process it also links these fragments of the constantly growing sf supertext to our changing sense of how genres function as a process marked by consistent growth and evolution and discussed in ways that reflect contemporary culture s own constant changes at the close of the nineteenth century american youths developed a growing interest in electricity and its applications machines and gadgetry when authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need the result was science fiction written especially for young adults while critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value science fiction inspired many young adults to study science and engineering and helped foster technological innovation at the same time these works also explored cultural and social concerns more commonly associated with serious literature nor was young adult science fiction a peculiarly american phenomenon authors in other countries likewise wrote science fiction for young adult readers this book examines young adult science fiction in the u s and several other countries and explores issues central to the genre the first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development included are discussions of science fiction for young adults in the u s and in canada great britain germany and australia these chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present the second section of the book considers topics of special interest to young adult science fiction some of the chapters look at particular forms and expressions of science fiction such as films and comic books others treat particular topics such as the portrayal of women in robert heinlein s works and representations

of war in young adult science fiction yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers all chapters reflect current research and the volume concludes with extensive bibliographies science during the cold war has become a matter of lively interest within the historical research community attracting the attention of scholars concerned with the history of science the cold war and environmental history the arctic recognized as a frontier of confrontation between the superpowers and consequently central to the cold war has also attracted much attention this edited collection speaks to this dual interest by providing innovative and authoritative analyses of the history of arctic science during the cold war successfully establish an emotional bond with customers by linking the desire for entertainment with emotion and explore how this is achieved through the most spectacular experience worlds across the globe the acclaimed science of discworld centred around an original pratchett story about the wizards of discworld in it they accidentally witnessed the creation and evolution of our universe a plot which was interleaved with a cohen stewart non fiction narrative about big science in the science of discworld ii our authors join forces again to see just what happens when the wizards meddle with history in a battle against the elves for the future of humanity on earth london is replaced by a dozy neanderthal village the renaissance is given a push the role of fat women in art is developed and one very famous playwright gets born and writes the play weaving together a fast paced discworld novelette with cutting edge scientific commentary on the evolution and development of the human mind culture language art and science this is a book in which the hard science is as gripping as the fiction the times while the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in american sf in his mars series edgar rice burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism writing in the 1930s george s schuyler revised burroughs normative sf triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead while both burroughs and schuyler wrote sf focusing on racial identity the largely separate genres of science fiction and african american literature prevented the similarities between the two authors from being adequately acknowledged and explored beginning in the 1960s samuel r delany more fully joined sf and african american literature delany expands on schuyler s racial constructionist approach to identity including gender and sexuality in addition to race critically intertwining the genres of sf and african american literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the african american literature connecting the popular fiction of burroughs the controversial career of schuyler and the postmodern texts of delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today last year we launched volume 1 of the reviews in fluorescence series the volume was well received by the fluorescence community with many e mails and letters providing valuable feedback we

subsequently thank you all for your continued support after the volume was published we were most pleased to learn that the volume is to be citable and indexed appearing on the isi database subsequently as well as the series having an impact number in due course individual chapters will appear on the database and be both citable and keyword searchable we feel that this will be a powerful resource to both authors and readers further disseminating leading edge fluorescence based material our intention with this new series is to both disseminate and archive the most recent developments in both past and emerging fluorescence based disciplines while all chapters are invited we welcome and indeed encourage the fluorescence community to suggest areas of interest that they feel need to be covered by the series in this new volume reviews in fluorescence 2005 volume 2 we have invited reviews in areas such as multi dimensional time correlated single photon counting fluorescence correlation spectroscopy rna folding lanthanide probes and fluorescent biosensors to name but just a few we hope you find this volume a useful resource and we look forward to receiving any suggestions you may have finally we would like to thank the authors for their timely articles caroleann aitken for the front cover design kadir asian for typesetting and mary rosenfeld for administrative support

Didi and the Gunslinger

Science Fiction Film

2013-05-09

science fiction film develops a historical and cultural approach to the genre that moves beyond close readings of iconography and formal conventions it explores how this increasingly influential genre has been constructed from disparate elements into a hybrid genre science fiction film goes beyond a textual exploration of these films to place them within a larger network of influences that includes studio politics and promotional discourses the book also challenges the perceived limits of the genre it includes a wide range of films from canonical sf such as le voyage dans la lune star wars and blade runner to films that stretch and reshape the definition of the genre this expansion of generic focus offers an innovative approach for students and fans of science fiction alike

Prewriting Your Screenplay

2018-07-16

prewriting your screenplay cements all the bricks of a story s foundations together and forms a single organic story growing technique starting with a blank slate it shows writers how to design each element so that they perfectly interlock together like pieces of a puzzle creating a stronger story foundation that does not leave gaps and holes for readers to find this construction process is performed one piece at a time one character at a time building and incorporating each element into the whole the book provides a clear cut set of lessons that teaches how to construct that story base around concepts as individual as the writer s personal opinions helping to foster an individual writer s voice it also features end of chapter exercises that offer step by step guidance in applying each lesson providing screenwriters with a concrete approach to building a strong foundation for a screenplay this is the quintessential book for all writers taking their first steps towards developing a screenplay from nothing getting them over that first monumental hump resulting in a well formulated story concept that is cohesive and professional

ICC Handbook of 21st Century Cereal Science and

Technology

2023-06-30

The Science of The Mandalorian

2023-11-07

take a trip beyond this earth to explore the myths of the mandalorian and uncover the anatomy of the newest space western in the star wars universe star wars dominates the film world the combined box office revenue of the star wars movies equates to over 10 billion making it the second highest grossing film franchise of all time but this franchise is no blaster from the past its fantastically successful films have now been followed by multiple television series set in that same galaxy far far away the franchise s flagship television series and likely the firmest fan favorite for some time to come is the mandalorian tracing the tale of the titular bounty hunter traveling across the furthest reaches of that mythic galaxy the mandalorian has been greatly praised and highly acclaimed for creating characters with gravitas and originality worlds with depth and impact resulting in some of the best star wars content ever even though it s set in deep space the mandalorian has as much in common with western movies as it does with science fiction saloons bandits gun duels bounty hunters outlaws with a price on their heads space exploration as a final frontier and a wild hero who doesn t quite belong in a lawless part of the galaxy after the fall of the empire the science of the mandalorian takes you on a badass journey with a mysterious lone gunfighter in the outer reaches of the galaxy where your beskar armor will protect you from many things but not the sight of a small green carnivorous humanoid with big black eyes and mysterious powers this is the way

Frontier Science

2024-03-26

between 1945 and 1970 canada s department of national defence sponsored scientific research into the myriad challenges of military operations in cold regions to understand and overcome the impediments of the country s cold climate scientists studied cold weather acclimatization hypothermia frostbite and psychological morale for soldiers assigned to active duty in northern canada frontier science investigates the history of military science in northern canada during this period of the cold war highlighting the consequences of government funded research for humans and nature alike the book

reveals how under the guise of environmental protection research the canadian military sprayed pesticides to clear bushed areas used radioactive substances to investigate vector borne diseases pursued race based theories of cold tolerance and enabled wide ranging tests of newly developed weapons and equipment in arguing that military research in northern canada was a product of the cold war matthew s wiseman tackles questions of government power scientific authority and medical and environmental research ethics based on a long and deep pursuit of declassified records archival sources and oral testimony frontier science is a fascinating new history of military approaches to the human nature relationship

Five-Minute Science Fiction Stories for Kids

2023-10-13

five minute science fiction stories for kids sci fi stories for young explorers invites young readers to journey through captivating tales of imagination and wonder within these pages you ll meet intrepid young adventurers brave young inventors and imaginative young minds all exploring the limitless possibilities of the universe these science fiction stories are crafted to spark curiosity empathy and the boundless potential within every child they ll transport young explorers to distant planets introduce them to time traveling inventors and immerse them in the creative world of robots aliens and futuristic technology as the young protagonists navigate thrilling adventures readers will learn valuable lessons about friendship creativity and the beauty of embracing one s uniqueness the stories demonstrate the power of connection knowledge sharing and the ability to work together to create a brighter harmonious future perfect for bedtime or quick moments of adventure each story can be enjoyed in just five minutes with vibrant storytelling five minute science fiction stories for kids is not only a gateway to endless imagination but also a source of inspiration for young minds encouraging them to explore the wonders of the universe and the depths of their own creativity this collection of science fiction stories is a world of possibilities waiting to be discovered by young readers whether they dream of becoming young inventors intrepid explorers or imaginative storytellers this book is an invitation to embark on exciting journeys ignite curiosity and celebrate the marvels of science fiction open the cover and let your young explorers set out on thrilling adventures within the pages of five minute science fiction stories for kids the future is bright and the universe is theirs to explore

Science Fiction Film Directors, 1895-1998

2011-07-01

Dogmatism in Science and Medicine

2014-01-10

the nature of scientific activity has changed dramatically over the last half century and the objectivity and rigorous search for evidence that once defined it are being abandoned increasingly this text argues dogma has taken the place of authentic science this study examines how conflicts of interest both institutional and individual have become pervasive in the science world and also explores the troubling state of research funding and flaws of the peer review process it looks in depth at the dominance of several specific theories including the big bang cosmology human caused global warming hiv as a cause of aids and the efficacy of anti depressant drugs in a scientific environment where distinguished experts who hold contrary views are shunned this book is an important contribution to the examination of scientific heterodoxies

Science, Money, and Politics

2003-04-15

greenberg explores how scientific research is funded in the united states including why the political process distributes the funds the way it does and how it can be corrupted by special interests in academia business and political machines

Terminology Science in Russia today

2014-02-28

the study of terminology has always occupied a unique place in the field of specialized language research its object the terminology of various domains encompasses more than just the descriptive linguistic level of lexicology and its application specialized lexicography morphology syntax and the textual level as well as the role of culture in communication are all fields in which terminology has its specific functions and potential in the history of the discipline several centers for the research and instruction of terminology emerged however the study of terminology in russia has been largely overlooked by its european neighbors the time has come to offer an in depth look into the research being performed and to demonstrate the vitality of the current research landscape today s terminology research in russia makes a lasting balanced impression in this diverse and wide ranging volume which presents many ideas for further research

The Rise and Fall of American Science Fiction, from the 1920s to the 1960s

2019-10-04

by examining important aspects of science fiction in the twentieth century this book explains how the genre evolved to its current state close critical attention is given to topics including the art that has accompanied science fiction the subgenres of space opera and hard science fiction the rise of sf anthologies and the burgeoning impact of the marketplace on authors included are in depth studies of key texts that contributed to science fiction s growth including philip francis nowlan s first buck rogers story the first published stories of a e van vogt and the early juveniles of isaac asimov arthur c clarke and robert heinlein

The Saturday Review of Politics, Literature, Science and Art

1880

the history of science is littered with mad bad and delightfully dotty inventions from the bicycle that relied for its momentum on the rider wagging his head back and forth continually to the improved pneumatic advertising hat a bowler that hurled a lit up billboard into the air at the touch of a button or the suitcase that turned into a small boat for the nervous ferry passenger here is the chance to sample among other delights professor ray s nose adjusting machine admiral popov s circular warship the perfect sleeping partner a japanese pillow shaped just like a man with an arm fitted at the right angle for a comforting cuddle and last but by no means least calantarient s improved dung trap for carriage horses employed by ladies of fashion and those of a delicate constitution

Science's Strangest Inventions

2015-06-04

this collection of essays provides the first systematic and multidisciplinary analysis of the role of gender in the formation and dissemination of the american social sciences in the late nineteenth and early twentieth centuries other books have traced the history of academic social science without paying attention to gender or have described women s social activism while ignoring its relation to the production of new social knowledge in contrast this volume draws long overdue attention to the ways in which changing gender relations shaped the development and organization of the new social knowledge and it challenges the privileged position that academic and mostly male social science has been granted in traditional histories by showing how women produced and popularized new forms of social knowledge in such places as settlement houses and the russell sage foundation the book s varied perspectives building on recent work in history and feminist theory break from the traditional view of the social sciences as objective bodies of expert knowledge contributors examine new forms of social knowledge rather as discourses about gender relations and as methods of cultural critique the book will create a new framework for understanding the development of both social science and the history of gender relations in the united states the contributors are guy alchon nancy berlage desley deacon mary dietz james farr nancy folbre kathryn kish sklar dorothy ross helene silverberg and kamala visweswaran

Gender and American Social Science

2021-03-09

of all the inventions of the nineteenth century the scientist is one of the most striking in revolutionary france the science student taught by men active in research was born and a generation later the graduate student doing a phd emerged in germany in 1833 the word scientist was coined forty years later science increasingly specialised was a becoming a profession men of science rivalled clerics and critics as sages they were honoured as national treasures and buried in state funerals their new ideas invigorated the life of the mind peripatetic congresses great exhibitions museums technical colleges and laboratories blossomed and new industries based on chemistry and electricity brought prosperity and power economic and military eighteenth century steam engines preceded understanding of the physics underlying them but electric telegraphs and motors were applied science based upon painstaking interpretation of nature the ideas discoveries and inventions of scientists transformed the world lives were longer and healthier cities and empires grew societies became urban rather than agrarian the local became global and by the opening years of the twentieth century science was spreading beyond europe and north america and women were beginning to be visible in the ranks of scientists bringing together the people events and discoveries of this exciting period

into a lively narrative this book will be essential reading both for students of the history of science and for anyone interested in the foundations of the world as we know it today

The Making of Modern Science

2009-11-16

a welcome overview of black superheroes and afrocentric treatments of black white relations in us superhero comics since the 1960s imagetext journal winner american book award before columbus foundation super black places the appearance of black superheroes alongside broad and sweeping cultural trends in american politics and pop culture which reveals how black superheroes are not disposable pop products but rather a fascinating racial phenomenon through which futuristic expressions and fantastic visions of black racial identity and symbolic political meaning are presented adilifu nama sees the value and finds new avenues for exploring racial identity in black superheroes who are often dismissed as sidekicks imitators of established white heroes or are accused of having no role outside of blaxploitation film contexts nama examines seminal black comic book superheroes such as black panther black lightning storm luke cage blade the falcon nubia and others some of whom also appear on the small and large screens as well as how the imaginary black superhero has come to life in the image of president barack obama super black explores how black superheroes are a powerful source of racial meaning narrative and imagination in american society that express a myriad of racial assumptions political perspectives and fantastic re imaginings of black identity the book also demonstrates how these figures overtly represent or implicitly signify social discourse and accepted wisdom concerning notions of racial reciprocity equality forgiveness and ultimately racial justice a refreshingly nuanced approach nama complicates the black superhero by also seeing the ways that they put issues of post colonialism race poverty and identity struggles front and center rain taxi

Super Black

2011-10-01

this collection of essays examines the contribution of british plays to key social political and intellectual debates since 2000 it explores some of the most pressing concerns that have dominated the public discourse in britain in the last decade focusing on their representation in dramatic texts each essay provides an in depth analysis of one play assessing its particular contribution to the debate in question the book aims to show how contemporary drama has developed unique ways to present the complexities and ambiguities of certain issues with aesthetic as well as emotional appeal

from the next generation and the x files to farscape and enterprise sci fi television series in the us have multiplied since the 1980s jan johnson smith shows how in line with national political upheavals this vibrant and perplexing genre set about expanding the myth of the western frontier into deep space she looks at the sense of wonder or sublime that infuses much frontier art and science fiction and traces a possible historical precedent to the genre in the fabulous and heroic journeys of the classical epic she discusses narrative styles and their influences from the overarching narrative of babylon 5 to the episodic formula of the outer limits considers how experimental series such as twin peaks challenge conventional structures and how and why sci fi television has adopted new technologies she also explores the juxtaposition of arcane language and technological jargon in modern american sci fi television revealing the extraordinarily alien yet curiously familiar arena it creates

American Science Fiction TV

2004-09-24

for the contemporary film audience science fiction has become a key locus for displaying and imaginatively addressing its most pressing concerns those concerns increasingly surface not just as displaced subjects injected into conventional sf narratives but as inflections in the very nature of the genre we might describe these issues that bulk so large in our everyday world as angling into the world of science and technology becoming a kind of slant presence in the genre and in the process altering the thrust of our sf films and other screen media resulting in what seems like a proliferation of sub genre labels that mark off a substantially new group of sf cinemas these cinemas challenge us to view or read them differently from perspectives that are just coming into focus through an introductory overview and series of articles on various of these contemporary slants and the theories that drive them this volume offers a guide to both what the new sf cinemas are about and how we have come to think about or read them differently in the process it also links these fragments of the constantly growing sf supertext to our changing sense of how genres function as a process marked by consistent growth and evolution and discussed in ways that reflect contemporary culture s own constant changes

Chamber's Journal of Popular Literature, Science and Arts

1861

at the close of the nineteenth century american youths developed a growing interest in electricity and its applications machines and gadgetry when authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need the result was science fiction written especially for young adults while critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value science fiction inspired many young adults to study science and engineering and helped foster technological innovation at the same time these works also explored cultural and social concerns more commonly associated with serious literature nor was young adult science fiction a peculiarly american phenomenon authors in other countries likewise wrote science fiction for young adult readers this book examines young adult science fiction in the u s and several other countries and explores issues central to the genre the first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development included are discussions of science fiction for young adults in the u s and in canada great britain germany and australia these chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present the second section of the

the acclaimed science of discworld centred around an original pratchett story about the wizards of discworld in it they accidentally witnessed the creation and evolution of our universe a plot which was interleaved with a cohen stewart non fiction narrative about big science in the science of discworld ii our authors join forces again to see just what happens when the wizards meddle with history in a battle against the elves for the future of humanity on earth london is replaced by a dozy neanderthal village the renaissance is given a push the role of fat women in art is developed and one very famous playwright gets born and writes the play weaving together a fast paced discworld novelette with cutting edge scientific commentary on the evolution and development of the human mind culture language art and science this is a book in which the hard science is as gripping as the fiction the times

Brand Lands, Hot Spots and Cool Spaces

2006

while the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in american sf in his mars series edgar rice burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism writing in the 1930s george s schuyler revised burroughs normative sf triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead while both burroughs and schuyler wrote sf focusing on racial identity the largely separate genres of science fiction and african american literature prevented the similarities between the two authors from being adequately acknowledged and explored beginning in the 1960s samuel r delany more fully joined sf and african american literature delany expands on schuyler s racial constructionist approach to identity including gender and sexuality in addition to race critically intertwining the genres of sf and african american literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the african american literature connecting the popular fiction of burroughs the controversial career of schuyler and the postmodern texts of delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today
