2015-01 this is a new release of the original 1935 edition  
[Poems of Wisdom and Learning in Old English](#) 1976 excerpt from some english and latin sources and parallels for the morality of wisdom a dissertation when this study of the sources and parallels for wisdom was begun it was my intention to include the french field but the mass of ecclesiastical latin that had to be gone through proved to be so large that i found it necessary to confine myself to that and the english even in the latin field no pretence to completeness is made for example much of richard rolle s latin work still in manuscript has not been consulted owing to the limited time which i could spend in england it is to be regretted that these works which were collected by mr carl horstman for a volume in his library of early english writers have never been printed likewise bonaventura s writings have not been accessible for a thorough examination it is very probable that a search through these works would yield other sources those that have been found however are sufficient to show our author s relations with contemporary and earlier movements of thought and to show his method of work it is not likely that the finding of two or three other latin sources would materially add to these results with respect to the french field the situation is different if the satire on social and political conditions in the third division of the play is not original with our author it is probably based upon a french source at any rate the source is pretty certainly not in the writ ings of the mystics which furnished all those that have been found a search through the french literature might give some valuable information about another side of our author s affiliations this investigation i hope to make in the near future in selecting sources for a play like wisdom in which most of the material is conventional one is always in danger of attaching too much importance to mere similarity in ideas i have tried to avoid this danger by excluding from the list of sources all works in which there was no significant similarity in phraseology or ar rangement in some cases i was in doubt as to a passage for example i feel sure that 11 917 28 in the play follow closely an undiscovered version of a conventional complaint against man s ingratitude to christ one version of which is given in the passages quoted from lambeth ms 853 and other versions in the works cited in the footnote p no one of these forms however about the publisher forgotten books publishes

**Gnosis** 2006 excerpt from angelic wisdom concerning the divine love and the divine wisdom the present translation is based upon the recommendations of the revision committee of the swedenborg society and it is believed that in technical respects those recommendations have been fully carried out in addition to this fidelity to the matter and manner of swedenborg has governed the translation more remains to be done in the same direction even with this small work there are phrases which are still to be solved into english idioms by the painstaking translators of the future but at present it has not seemed advisable to put idiomatic english in the first place and swedenborg s forms of speech in the second there is temptation to do so but whenever the process has been attempted the immediate result has shown that some pregnant meaning has escaped in the altered phrase swedenborg is ever clear and definite and employs unusual forms of speech only for unusual purposes to convert these forms into

current english would void their intrinsic meaning a great part of the present work is of this unusual significance being an expression of hitherto unknown spiritual things in the imperfect vehicle of natural language and therefore to correspond to the occasion the phraseology is unusual the latin however is always felicitous and express and the attempt has been made to emulate it in this respect and yet to carry it over into an english as idiomatic as possible about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
