in response to rapid and unsettling social economic and climate changes fearmongering now features as a main component of public life right wing nationalist populism has become a hallmark of politics around the world no less so in quebec alexa conradi has made it her life's work to understand and to generate thoughtful debate about this worrisome trend as the first president of québec solidaire and the president of canada's largest feminist organisation the fédération des femmes du québec conradi refused to shy away from difficult issues the charter of quebec values religion and islam sovereignty rape culture and violence against women extractive industries and the treatment of indigenous women austerity policy and the growing gap between rich and poor

this determination to address uncomfortable subjects has made conradi an anglo montrealer a sometimes controversial leader in fear love and liberation in contemporary quebec conradi invites us to take off our rose coloured glasses and to examine quebec s treatment of women with more honesty through her personal reflections on quebec politics and culture she dispels the myth that gender equality has been achieved and paves the way for a more critical understanding of what remains to be done

employment for former prisoners is a critical pathway toward reintegration into society and is central to the processes of desistance from crime nevertheless the economic climate in western countries has aggravated the ability of former prisoners and people with criminal records to find gainful employment after

prison opens with a former prisoner's story of reintegration employment experiences next relying on a combination of research interviews quantitative data and literature contributors present an international comparative review of Canada's evolving criminal record legislation the promotive features of employment the complex constraints and stigma former prisoners encounter as they seek employment and the individual and societal benefits of assisting former prisoners attain gainful employment a main theme throughout is the interrelationship between employment and other central conditions necessary for safety and sustenance this book offers suggestions for criminal record policy amendments and new reintegration practices that would assist individuals in the search for employment using the evidence and research findings of practitioners and scholars in social work criminology and law psychology and other related fields the contributors concentrate on strategies that will reduce the stigma of having been in prison foster supportive relationships between social and legal agencies and prisons and parole systems and encourage individually tailored resources and training following release of individuals

this research topic is the second volume of research topic binge drinking in the adolescent and young brain please see the first volume here binge drinking is also known as heavy episodic drinking or college drinking is a highly prevalent pattern in most western countries characterized by the intake of large amounts of alcohol in a short time followed by periods of abstinence this

excessive pattern of alcohol use is a regular practice in around a third of European and American youth the high prevalence of BD at this age is of particular concern since adolescents are in a period of special vulnerability to neurotoxic effects of alcohol mainly due to the structural and functional changes going on in the brain throughout this key developmental stage as showed in the first volume of the research topic evidence gathered during the last decade from animal and human studies seems to point out multiple brain anomalies associated with BD at different levels biochemical structural functional but also cognitive and affective in this second volume our aim is to bring together the most recent studies namely original research and systematic or critical reviews which provide a comprehensive approach regarding the effects of BD on the adolescent and young brain thus we aim to include manuscripts from different domains preclinical and clinical research perspectives genetic behavioral neuropsychological clinical psychology psychophysiology neuroimaging etc and methods behavioural biochemical EEG MEG MRI etc likewise we welcome submissions aimed at examining the effects of BD beyond the brain personality dimensions polygenic risk peripheral inflammation cortisol response gut microbiome etc and approaches focused on reducing BD such as cognitive training and or neuromodulation by tDCS TMS etc

2021-12-13

considerable research has been devoted to understanding how positive emotional processes influence our thoughts and behaviors and the resulting body of work clearly indicates that positive emotion is a vital ingredient in our human quest towards well being and thriving yet the role of positive emotion in psychopathology has been underemphasized such that comparatively less scientific attention has been devoted to understanding ways in which positive emotions might influence and be influenced by psychological disturbance presenting cutting edge scientific work from an internationally renowned group of contributors the oxford handbook of positive emotion and psychopathology

provides unparalleled insight into the role of positive emotions in mental health and illness the book begins with a comprehensive overview of key psychological processes that link positive emotional experience and psychopathological outcomes the following section focuses on specific psychological disorders including depression anxiety trauma bipolar disorder and schizophrenia as well as developmental considerations the third and final section of the handbook discusses translational implications of this research and how examining populations characterized by positive emotion disturbance enables a better understanding of psychiatric course and risk factors while simultaneously generating opportunities to bridge gaps between basic science models and psychosocial interventions with its rich and multi layered focus the oxford handbook of positive emotion and psychopathology will be of interest to researchers teachers and students from a range of disciplines including social psychology clinical psychology and psychiatry biological psychology and health psychology affective science and neuroscience
