## **The Boundaries of Belonging**

2016-12-09

this book addresses an issue currently making political headlines in the united states immigration immigrants have long engendered debates about the boundaries of belonging with some singing their praises and others warning of their dangers in particular the 11 million unauthorized immigrants in the country provoke heated disagreements with issues of legality and morality at the forefront increasingly such debates take place online by organizations in the immigrant rights and the immigration control movements who engage in symbolic work that includes blurring crossing maintaining solidifying and shifting the boundaries of belonging based on data collected from 29 national level groups this book features a cultural sociological analysis of the online materials deployed by social movement organizations debating immigration in the united states

## **Crust-Mantle and Lithosphere-Asthenosphere Boundaries**

2017-05-10

this 10 chapter volume encompasses contributions from a wide spectrum of earth science disciplines including geophysics geodynamics geochemistry and petrology to provide an overview of the nature and evolution of the crust mantle and lithosphere asthenosphere boundaries in different tectonic settings combining studies that exploit different types of data and interpretative approaches the integration of geochemical geophysical and geodynamic data sets and their interpretation provides a state of the art summary of current understanding and will serve as a blueprint for future research activities

## ***Research, Boundaries, and Policy in Networked Learning***

2016-08-18

this book presents cutting edge peer reviewed research on networked learning organized by three themes policy in networked learning researching networked learning and boundaries in networked

learning the policy in networked learning section explores networked learning in relation to policy networks spaces of algorithmic governance and more the boundaries in networked learning section investigates frameworks of students digital literacy practices among other important frameworks in digital learning lastly the research in networked learning section delves into new research methods in the field

## **Scientific Knowledge and the Transgression of Boundaries**

2016-11-30

the aim of this book is to understand and critically appraise science based transgression dynamics in their whole complexity it includes contributions from experts with different disciplinary backgrounds such as philosophy history and sociology thus it is in itself an example of boundary transgression scientific disciplines and their objects have tended to be seen as permanent and distinct however science is better conceived as an activity that constantly surpasses erases and rebuilds all kinds of boundaries either disciplinary socio ethical or ecological this transgressive capacity a characteristic trait of science and its applications defines us as knowledge societies however scientific and technological developments are also sources of serious environmental and social concerns

## ***The Boundaries in Financial and Non-Financial Reporting***

2018-03-16

although the need to expand the boundaries of financial reporting has been discussed since the mid 1990s little consideration has been given to the evolution and discourses of integrated reporting of non financial aspects yet by investigating how and why an organisation defines and its reporting boundaries it is possible to understand what is truly valued or not in its business model this innovative book reviews the guidelines and frameworks from the major relevant international organisations including the international accounting standards board global reporting initiative sustainability accounting standards board international integrated reporting council carbon disclosure standards board and the world intellectual capital initiative and analyses their development and impact on the boundaries of financial and non financial reporting illustrated with case studies and interviews with representatives of these organisations this concise volume makes a significant contribution to the future of reporting theory and practice it will be of great interest to advanced students researchers practitioners and policy makers

## **Research Handbook on Law, Governance and Planetary Boundaries**

2021-04-30

this comprehensive research handbook is the first study to link law and earth system science through the epistemic lens of the planetary boundaries framework it critically examines the legal and governance aspects of the framework considering not only each planetary boundary but also a range of systemic issues including the ability of law to keep us within the planetary boundaries safe operating space

## **Breaking Boundaries**

2019-12-01

breaking boundaries analyzes efforts made by communities and policy makers around the world to push beyond conventional approaches to environmental decision making to enhance public acceptance sustainability and the impact of those decisions in local contexts the current political climate has generated uncertainty among citizens industry interests scientists and other stakeholders but by applying concepts from various perspectives of environmental communication and deliberative democracy this book offers a series of lessons learned for both public officials and concerned citizens the contributors offer a broader understanding of how individuals and groups can get involved effectively in environmental decisions through traditional formats as well as alternative approaches ranging from leadership capacity building to social media activity to civic technology

## **The Transgression of the Planetary Nitrogen Boundary. What is Germany's Internal and External Contribution?**

bachelor thesis from the year 2016 in the subject geography earth science cartography geographic information science and geodesy grade 1 7 humboldt university of berlin potsdam institut für klimafolgenforschung language english abstract this work tries to answer the question of germany s contribution to agricultural sources through the total consumption of products and services an environmentally extended multi regional input output mrio analysis is applied to track and account direct and indirect n fertilizer use through international supply chains in 2007 from the resulting 31 kg n cap consumption based n fertilizer use 60 are embodied in imports and 40 used internally comparing consumption based and production based val ues shows that germany is a net importing country of embodied n fertilizer use with 9 kg n cap the total amount of n fertilizer used for domestic production imports and exports is 41 kg n cap due to low long term storage of nr in the agricultural system nr sources cor respond approximately to nr losses rockström et al 2009 bodirsky et al 2014 that can cause multiple but not linearly dependent environmental impacts galloway et al 2003 bodirsky et al 2014 complexities from the nitrogen cascade galloway et al 2008 and social economic dynamics puts also locally manifested n boundary processes on a global scale häyhä et al 2014 7 challenging consumption based national bottom up boundaries in view of external n flows a footprint boundary perspective that compares current na tional consumption based shoe sizes per capita with an equal per capita share of the pb n could provide a relevant estimation of the needed reductions to return to the safe operating space for germany a transgression of 270 310 of which approximately two thirds is ex ternal and one third internal nr from human intended fixation processes is found it can be concluded that german consumption drives substantial local nitrogen pollution in other countries and mitigation especially through sufficiency approaches is necessary to return to the safe operating space

## **Negotiating the Boundaries of Belonging**

2017-09-27

nils witte explores turkish migrants destigmatization strategies and investigates their legal and symbolic motives for naturalisation using mixed methods and unique data the author shows that turkish migrants inclination to naturalise would be stronger if they were allowed to retain their former citizenship and if they were recognized as symbolic members of german society minority members enjoy expansive rights as permanent residents and many are entitled to hold german citizenship however they often experience symbolic exclusion making symbolic membership a rare motive for naturalisation

## **Managing Knowledge Integration Across Boundaries**

2017

knowledge integration the purposeful combination of specialized and complementary knowledge to achieve specific tasks is becoming increasingly important for organizations facing rapidly changing institutional environments globalized markets and fast paced technological developments the need for knowledge integration is driven by knowledge specialization and its geographic and organizational distribution in the global economy the increasing complexity and relevance of the knowledge integration problem is apparent in emerging new fields of research such as open innovation or the merging of existing ones e g organizational learning and strategy in global competition the successful management of knowledge integration underpins firms ability to innovate generate profit grow and ultimately survive this book provides conceptual contributions as well as empirical studies that examine knowledge integration essentially as a boundary problem knowledge integration becomes a problem when boundaries between knowledge fields and the institutions that preside over those fields are not clear or become fluid and contestable this fluidity and the competitive pressures this fluidity generates are persistent and permanent features of the world we live in this book put forward a consistent set of ideas methods and tools useful to interpret analyze and act upon the processes of knowledge integration across boundaries

## **Cross-Border Marriages**

2023-03-21

marriages that involve the migration of at least one of the spouses challenge two intersecting facets of the politics of belonging the making of the good and legitimate citizens and the acceptable family in

Europe cross border marriages have been the target of increasing state controls an issue of public concern and the object of scholarly research the study of cross border marriages and the ways these marriages are framed is inevitably affected by states concerns and priorities there is a need for a reflexive assessment of how the categories employed by state institutions and agents have impacted the study of cross border marriages this collection of essays analyses what is at stake in the regulation of cross border marriages and how European states use particular categories e.g. sham forced and mixed marriages to differentiate between acceptable and non acceptable marriages when researchers use these categories unreflexively they risk reproducing nation centred epistemologies and reinforcing state informed hierarchies and forms of exclusion the chapters in this book offer new insights into a timely topic and suggest ways to avoid these pitfalls differentiating between categories of analysis and categories of practice adopting methodologies that do not mirror nation states logic and engaging with general social theory outside migration studies this book will be of interest to researchers and academics of sociology politics international relations social and cultural anthropology human geography social work and public policy barring one all the chapters in this book were originally published as a special issue in the journal of ethnic and migration studies

an emerging issue in higher education studies is that of boundaries crossing this is the main topic of the book the transformation of university institutional and organizational boundaries several signals of shifting boundaries can be envisaged in higher education and research institutions which could be glimpsed through organizations the institutions and changes to the academic profession that of boundaries crossing in higher education is a complex and heterogeneous issue which characterizes scientific knowledge today and represents a key issue when looking at university transformations across contexts and policies instruments and practices the analysis of boundaries supplies interpretative frameworks for the interactions between the development of professions and disciplines as well as the relationships of the science with various parts of society such as state professionals and the market fuelling further the discussion on heis transformations allows capturing changes in the function objectives and scope of higher education and research institutions the move beyond sectoral and disciplinary boundaries and the increasingly blurred boundaries of academic professions and of scientific work public policies and he reforms can push or impede the mentioned transformations but they can also derive from individual likelihood of moving in blurring spaces or from the transformations of the epistemic communities and the emergence of new fields and sectors hence changes are there open to our observations
