*The Kansas City Review of Science and Industry* 1880 the university of colorado and the national bureau of standards have once again served as hosts for the cryogenic engineering conference in boulder colorado in presenting the papers of this twelfth annual meeting the 1966 cryogenic engineering conference committee has again recognized the excellent cooperation which has existed between these two organizations over the past decade with regard to both cryogenic research and conference activity this cooperation was demonstrated not only at the 1966 cryogenic engineering conference but also at the international institute of refrigeration commission i meeting which was also hosted by these two organizations immediately following the cryogenic engineering conference these two meetings have provided attendees with one of the most comprehensive coverages of cryogenic topics that has ever been presented at one location emphasis on major international advances in helium technology at the international institute of refrigeration commission i meeting has been possible largely through the national science foundation grant gk 1116 to the university of colorado the cryogenic engineering conference committee gratefully acknowledges this support because of its valuable international contribution to the cryogenic engineering conference as in the past the cryogenic engineering conference committee is grateful for the continued assistance of all the dedicated workers in the cryogenic field who have contributed their time reviewing the preliminary papers for the program and the final manuscripts for this volume

**Report** 1890 handbook of thermal conductivity of liquids and gases covers practically all of the data available on the thermal conductivity of pure liquids and gases thermal conductivity data included in the book is based on original experimental measurements and correlations recommended or adopted as a standard by the national standard reference data service of the russian federation new tabulations of thermal conductivity data on high molecular organic fluids and the alkali metals in both liquid and gaseous states are featured as well this book will be an important reference for all researchers working in thermodynamics

Journal 1881 contains results of investigations researches etc pertaining to scientific technical and manufacturing interests of the country
