river systems around the world are degraded and are being used unsustainably meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows this book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks the author presents a comprehensive study of the legal frameworks in four jurisdictions the states of oregon and colorado in the western united states the province of alberta in canada and the murray darling basin in australia basin state of new south wales a close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors in all cases the law has been deployed to steer and coordinate these water governance activities the book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate

this book explores how peer reviews are used in school improvement accountability and education system reform importantly these issues are studied through numerous international cases and new

empirical evidence this volume also identifies and describes barriers and facilitators to the development use sustainability and expansion of school peer review school peer reviews are a form of internal evaluation driven by schools themselves rather than externally imposed such as with school inspections schools collaborate with other schools in networks collect data through self evaluation and in school review visits they provide feedback challenge and support to each other despite the increased use of school peer review in system reform and school improvement very little research has been conducted on this model and there is a dearth of literature that looks at the phenomenon internationally this book fills this gap and will be an invaluable source for academics in school leadership and educational evaluation and accountability as well as those working at the level of executive leadership in school networks ngos and in government policy making

a permanent political class has emerged on a scale unprecedented in our nation s history its self dealing nepotism and corruption contribute to rising inequality its reach extends from the governing elite throughout nongovernmental institutions aside from constituting an oligarchy of prestige and power it enables the creation of an aristocracy of massive inherited wealth that is accumulating immense political power in a muckraking tour de force reminiscent of lincoln

steffens upton sinclair and c wright mills american oligarchy demonstrates the way the corrupt culture of the permanent political class extends down to the state and local level ron formisano breaks down the ways this class creates economic inequality and how its own endemic corruption infects our entire society formisano delves into the work of not just politicians but lobbyists consultants appointed bureaucrats pollsters celebrity journalists behind the scenes billionaires and others their shameless pursuit of wealth and self aggrandizement often at taxpayer expense rewards channeling the flow of income and wealth to elites that inequality in turn has choked off social mobility and made a joke of meritocracy as formisano shows these forces respond to the oligarchy's power and compete to bask in the presence of the 01 percent they also exacerbate the dangerous instability of an american democracy divided between extreme wealth and extreme poverty
