The Chemical News 1874

the history of chemistry spans a period from very old times to the modern era since several millennia bc civilizations were using technologies that would eventually form the basis of the various branches of chemistry chemistry was preceded by its protoscience alchemy which is an intuitive but non scientific approach to understanding the constituents of matter and their interactions it was unsuccessful in explaining the nature of matter and its transformations but by performing experiments and recording the results alchemists set the stage for modern chemistry while both alchemy and chemistry are concerned with matter and its transformations the crucial difference was given by the scientific method that chemists employed in their work chemistry is considered to have become an established science with the work of antoine lavoisier who developed a law of conservation of mass that demanded careful measurement and quantitative observations of chemical phenomena the object of this work is to present a comprehensive overview of the progress of chemistry from its first rude and modest beginnings till it has reached its modern state of importance as one of the leading sciences volume 1 of alchymy of the chemical knowledge possessed by the ancients chemistry of the arabians of the progress of chemistry under paracelsus and his disciples of van helmont and the iatrochemists of agricola and metallurgy of glauber lemery and some other chemists of the end of the seventeenth century of the attempts to establish a theory in chemistry of the foundation and progress of scientific chemistry in great britain volume 2 of the foundation and progress of scientific chemistry in great britain of the progress of philosophical chemistry in sweden progress of scientific chemistry in france progress of analytical chemistry of electro chemistry of the atomic theory of the present state of chemistry

this book emphasizes the use of four complex plane formalisms impedance admittance complex capacitance and modulus in a simultaneous fashion the purpose of employing these complex planes for handling semicircular relaxation using a single set of measured impedance data ac small signal electrical data is highly underscored the current literature demonstrates the importance of template version of impedance plot whereas this book reflects the advantage of using concurrent four complex plane plots for the same data this approach allows extraction of a meaningful equivalent circuit model attributing to possible interpretations via potential polarizations and operative mechanisms for the investigated material system thus this book supersedes the limitations of the impedance plot and intends to serve a broader community of scientific and technical professionals better for their solid and liquid systems this book addresses the following highlighted contents for the measured data but not limited to the 1 lumped parameter complex plane analysis lp cpa in conjunction with the bode plots 2 equivalent circuit model ecm derived from the lp cpa 3 underlying operative mechanisms along with the possible interpretations 4 ideal debye and non ideal non debye relaxations and 5 data handling criteria dhc using complex nonlinear least squares cnls fitting procedures

Embers in the Ashes (Of History and Indifference) 2017-12-27

love the pathless path that goes to your soul is really love a necessity for our lives why can t life be much simple mathematical with very clear rules to follow why we need to fall in love we should spend our lives only following the path the society taught us about finish school get a job make money try to be successful retire and then die why we need this complicated story of studying what love is about well first all of you have a heart inside of you to feel the life and being in a love story everything becomes more real following just the paths the society told you about should be boring this is why lots of poets and writers wrote so much trying to define the meaning of love in our lives when you are the kind of person that look at life in a logical and rational way falling in love looks like useless like a pathless path but discovering the love feelings in a time when everything looked like boring in your life redefines everything is never a good moment to fall in love cause you will always need to do something in the real life and looks like there is no time to loose for those silly feelings but one day when the feelings become so strong inside of you you realise that you just started to feel alive you always did what other taught you to do in life the parents friends teachers or people you know but no one came to you to whisper the secret of life if you want to feel alive just let your heart to fall in love you might loose your soul your heart your mind but you will feel being alive no other path gives you those feelings yesss truth be told love is the pathless path but it goes to your soul

Everyday Media Literacy 2002

first and foremost giving all praises and honor to god for sustaining me and allowing me to express myself through words
 thoughts and phrases for those that are close to me you know that i have been writing poetry for quite some time and have talked
 about writing a poetry book for some time initially it was more talk than action plus i thought would ever become reality but as the
 years went by and i started accumulating a small collection of poems i deemed worthy enough to share with others outside my
 inner circle the thought began to seem more realistic so i initially started drafting the book back in 2005 with the help of my aunt
 vanessa i was still re writing many of the poems since initially they were written in ebonics style you know da for the cause
 instead of because so there was some initial editing that was taking place then of course lifes trials and tribulation decided to
 intervene and press the pause button distractions came from every direction and i just could not devote quality time to the book
 meanwhile my aunt was working hard on the book cover and formatting the 1st draft of the poems i sent her things started to pick
 back up around the time i got married whether it was divine inspiration or my wifes intervention but either way i started working
 on the book again this was late 2007 and things were looking good for a summer of 2008 release then once again a setback
 occurred i found out my aunt had been battling cancer believe me when i tell you the poem book was the last thing on my mind
 its funny how mortality can restructure and reprioritize your entire program and what you deem important after a year and a half
 of battling cancer my aunt passed away on november 5th 2009 five days before the birth of my daughter talk about a trying time i
 attended the funeral 2 days after my daughters birth with my wife and child still in the hospital a myriad of emotions dancing
 around in my head but as fate would have it poetry brought stability back to my spirit i wrote several poems over the next couple
 of weeks that eased my spirit so fast forward to the spring of 2010 and my beautiful wife finally said enough procrastination this
 book is getting published and you have 3 months to make it happen she found an online publishing company and made the initial
 contact so it seems that it was destiny that i met her married her and she forced me to get moving on this book
