this book explores what remains an under studied aspect of samuel johnson s profile as a person and writer namely his attitude to social improvement the interpretive framework provided here is cross disciplinary and applies perspectives from social and cultural history legal history architectural history and of course english literature this allows johnson s writings to be read against the peculiarities of their historical milieu and reveals johnson in a new light as an advocate of social improvement for human betterment considering the multiplicity of narrative modes that have been employed the book points to the blurred boundaries and overlapping between history testimony and fiction and argues that a future biography of samuel johnson has to recognise that throughout his life he valued the utilitarian aspect of his manifesto as a writer to impart a more charitable attitude in the pursuit of a more caring society
