this book provides an updated state of the art review on  
new developments in alkali activation the main binder of  
concrete portland cement represents almost 80 of the total  
co2 emissions of concrete which are about 6 to 7 of the  
planet's total co2 emissions this is particularly serious in  
the current context of climate change and it could get even  
worse because the demand for portland cement is expected

to increase by almost 200 by 2050 from 2010 levels reaching 6000 million tons year alkali activated binders represent an alternative to portland cement having higher durability and a lower co2 footprint reviews the chemistry mix design manufacture and properties of alkali activated cement based concrete binders considers performance in adverse environmental conditions offers equal emphasis on the science behind the technology and its use in civil engineering
