are copies of greek and roman masterpieces as important as the originals they imitate the ancient art of transformation case studies from mediterranean contexts examines instances of human transformation in the ancient and early christian mediterranean world by exploring the ways in which art impacts aids or provides evidence for physical spiritual personal and social transitions building on arnold van gennepe's notion of universal rites of passage papers in this volume expand the definition of transformation to include widespread transitions such as shifts in political establishments and changes in cultural identity in considering these broadly defined passages authors have observed particular changes in the visual record whether they be manifest enigmatic or symbolic while several papers address transitions that are incomplete resulting in intermediary hybrid states others suggest that the medium itself can be integral to interpreting a transition and in some cases be itself transformed together the volume covers not only a broad chronological span c 5th century bc to 4th century ad but also an expansive geographical range egypt greece and italy reflecting upon issues central to a variety of mediterranean cultures egyptians etruscans greeks romans and early christians the ancient art of transformation documents how personal societal and historical changes become permanently fixed in the material record the ancient art of transformation examines the visual manifestation of human transformation in the ancient and early medieval mediterranean world exploring the role of art and visual culture in enabling hindering or documenting physical spiritual personal and social transitions such as pregnancy and birth initiations marriage death and funerals the definition of transformation is also expanded to address instances of less personal and more widespread transitions such as shifts in political establishments and changes in cultural identity in geographic locations additionally although the ancient material record documents certain rites of passage such as marriage and death extensively artifacts and their accompanying images are often studied simply to reconstruct these social processes authors here suggest that material evidence itself can be integral to interpreting a transition and in some cases be itself transformed further several papers address transitions that are incomplete resulting in intermediary hybrid states that are very often reflected in the visual record such as athenian vase painting imagery forecasting the bride as a mother displays of nudity that reflect intermediate life stages in etruscan art and octavian's visual transformation into pharaoh and augustus in egyptian architecture and material culture at its core the volume establishes current methods for understanding how ancient visual culture shaped informed and was affected by processes of transformation together these papers offer a close examination of various types of visual evidence from several cultures and periods e g etruscan greek roman early christian and document how personal societal and spaniards in the new world dividing the ancient world into three broad climatic categories the northern nomadic the temperate farmers and city dwellers and the tropical john boardman focuses on common solutions that man the artist has devised for the problems posed by the environment a factor that has also determined the nature of society and its arts the solutions are shown to have been very similar worldwide within each broad environmental zone and the pattern can be demonstrated in the arts no less than in social organization richly illustrated and clearly captioned the book covers the full range of ancient art produced across the globe from china and egypt through classical greece to south america africa australasia and oceania it illuminates the many similarities and differences evolved into art forms such as choral readings dance forms and drama itself she argues that art is borne out of emotion and is the artist's duty to transfer those feelings into some medium whether it be writing painting or drama with high emotional energy as a common thread behind all art forms harrison shows how ancient rituals gave rise to the development of greek sculpture as a demure way to give homage to the gods excerpt from the history of ancient art among the greeks cline and hawlin

also the causes to which may reasonably be attributed the points of resemblance and difference observable in the arts of different nations the soundness of his judgment the acuteness and originality of his observations and the copiousness of his illustrations drawn from an intimate familiarity with every extant monument of ancient art and with everything in ancient classic literature which could elucidate the subject to which he had devoted his life render him the most trustworthy instructive and delightful of the writers on art i cannot but think that a careful study of winckelmann's history of ancient art and a thoughtful consideration of the great principles embodied in it must necessarily tend to form a pure correct and elevated taste about the publisher forgotten books publishes works this is a new release of the original 1922 edition from book cover tombs temples and ancient art when joseph lindon smith went out to egypt as a young artist in 1898 archaeology was beginning to uncover some of the fabled treasures of an ancient land for the next half century he devoted himself to the great finds as they were excavated from the encroaching sands depicting them in countless paintings for the leading museums of the world he became the friend of flinder petrie the greatest of late nineteenth and early twentieth century egyptologists and the co worker of the best known archaeologists down to 1950 he explored and painted at petra persepolis ur palmyra and baalbek he also did work with sylvanus griswold morley in the ancient maya centers of america and painted in the far east his personal account of what transpired under his eyes and of the chronology and relations of ancient art over a wide area is at once exciting narrative and important history the many illustrations chosen from his painting provide visual accompaniment to his story of classical civilizations and reveal the literal quality of his own art which has in notable instances preserved for us the likeness of things that have since crumbled or faded on exposure to light and air after being buried for centuries tombs temples and ancient art gains strength for its informality for while the initiated will discover facts and interpretations of high importance to science all readers will recognize in it the work of a man alive to adventure excerpt from ancient art and its remains or a manual of the archaeology of art in this translation i have endeavoured to avoid as much as possible the introduction of new words but in the original various technical terms occur with which notwithstanding their novelty to the english reader i could not dispense because their rejection would occasion in some measure a sacrifice of sense or a disturbance of the system pursued by the author as in tectonics and architectonics for example i may also mention the word scalpture it is not i believe in use in our language but as scalptura designates a particular branch of ancient art i did not hesitate to anglicise it it may be proper also to explain that throughout the work a distinction is kept up between column and pillar the former denoting the circular supporting member of the different orders of architecture the latter the square pier the words formative and plastic likewise are employed as convertible epithets except in a few instances where the latter is used in its original and more restricted sense in these however its meaning may be discovered from the context the most learned of my readers will be most ready to make allowance for the difficulties of my task which were greatly enhanced at least in the notes by the authors desire to express his ideas in the briefest possible manner by the perhaps too unsparing use of ellipsis he has frequently rendered his meaning obscure or ambiguous in some instances i was enabled to discover the sense by my recollection of the monuments described in many others by reference to the authors sources and in some cases i have derived considerable benefit from the suggestions of professor donaldson whose valuable works on the architectural remains of greece and italy are so frequently referred to by müller and to whom i take this opportunity of offering my warmest thanks for his obliging assistance nevertheless i cannot flatter myself that i have always succeeded in overcoming the difficulties i have had to encounter and in glancing over the work i still find passages which i should have wished to amend about the publisher forgotten books publishes hundreds of thousands of rare and classic books find
