2006

dedicated to the preservation of all forms of off road recreation in an environmentally responsible manner

Though Not Dead

2012-10-10

kate shugak is a native aleut working as a private investigator in alaska she s 5 foot 1 inch tall carries a scar that runs from ear to ear across her throat and owns half wolf half husky dog named mutt resourceful strong willed defiant kate is tougher than your average heroine and she needs to be to survive the worst the alaskan wilds can throw at her though not dead kate s uncle sam dies leaving her a letter instructing kate to find his father the problem is sam s father disappeared nearly 90 years ago with a priceless tribal artifact as kate delves into the old man s life she unearths some surprising facts his service in world war two his friendship with crime writer dashiell hammet the problem is that she s not the only one interested in sam s past and this someone has no compunction about putting kate permanently out of the picture to get what they want

Refinement of Production Engines and New Control Strategies

2017-03-01

this collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines papers address design for a snowmobile using the epa test procedure and standard for off road vehicles along with more stringent u s national park best available technology bat standards that are likened to those of the california air resourced board carb innovative technology solutions include standard application for diesel engine designs applications to address and test both engine and track noise benefits of the miller cycle and turbocharging the sae international clean snowmobile challenge csc program is an engineering design competition the program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise the competition includes internal combustion engine categories that address both gasoline and diesel as well as the zero emissions category in which range and draw bar performance are measured the goal of the competition is designing a cleaner and quieter snowmobile the competitors modified snowmobiles are also expected to be cost effective and comfortable for the operator to drive

il numero di gennaio 2015 della rivista di filatelia e numismatica edita da unificato

Michigan Out-of-doors

2008

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

Boating

1995-01

silent partners taxpayers and the bankrolling of bombardier is the shocking account of how the canadian taxpayer unwittingly bankrolled the rise and fall of the bombardier empire bombardiers improbable rise from snowmobile manufacturer in backwoods quebec to the worlds largest producer of rail and mass transit equipment and the third largest aircraft manufacturer has been a source of national pride especially in quebec selling 94 per cent of its trains planes snowmobiles and watercraft outside the country and with sales of 24 billion and 75 000 employees in 24 countries bombardier had become a global powerhouse but this dazzling growth masked a host of problems

Popular Science

2002-12

volume 3 of this three part series presents more advanced topics and applications of relativistic quantum field theory the application of quantum chromodynamics to high energy particle scattering is discussed with concrete examples for how to compute qcd scattering cross sections experimental evidence for the existence of quarks and gluons is then presented both within the context of the naive quark model and beyond dr strickland then reviews our current understanding of the weak interaction the unified electroweak theory and the brout higgs englert mechanism for the generation of gauge boson masses the last two chapters contain a self contained introduction to finite temperature quantum field theory with concrete examples focusing on the high temperature thermodynamics of scalar field theories qed and qcd

Technical Data Digest

1932

this is an exact reproduction of a book published before 1923 this is not an ocr d book with strange characters introduced typographical errors and jumbled words this book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process we believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide we appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book

Non-ferrous Metal Yearbook

1999

ceramic science and engineering basics to recent advancements covers the fundamentals classification and applications surrounding ceramic engineering in addition the book contains an extensive review of the current published literature on established ceramic materials other sections present an extensive review of up to date research on new innovative ceramic materials and reviews recently published articles case studies and the latest research outputs the book will be an essential reference resource for materials scientists physicists chemists and engineers postgraduate students early career researchers and industrial researchers working in r d in the development of ceramic materials ceramic engineering deals with the science and technology of creating objects from inorganic and non metallic materials it combines the principles of chemistry physics and engineering fiber optic devices microprocessors and solar panels are just a few examples of ceramic engineering being applied in everyday life advanced ceramics such as alumina aluminum nitride zirconia zno silicon carbide silicon nitride and titania based materials each of which have their own specific characteristics and offer an economic and high performance alternative to more conventional materials such as glass metals and plastics are also discussed covers environmental barrier ceramic coatings advanced ceramic conductive fuel cells processing and machining technology in ceramic and composite materials photoluminescent ceramic materials perovskite ceramics and bioinspired ceramic materials reviews both conventional established ceramics and new innovative advanced ceramics contains an extensive review of the current published literature on established ceramic materials

NASA Technical Note

1964

sodium ion batteries an essential resource with coverage of up to date research on sodium ion battery technology lithium ion batteries form the heart of many of the stored energy devices used by people all across the world however global lithium reserves are dwindling and a new technology is needed to ensure a shortfall in supply does not result in disruptions to our ability to manufacture reliable efficient batteries in sodium ion batteries energy storage materials and technologies eminent researcher and materials scientist yan yu delivers a comprehensive overview of the state of the art in sodium ion batteries sibs including their design principles cathode and anode materials electrolytes and binders the author discusses high performance rechargeable sodium ion battery technology in the contexts of energy power density and electrochemical stability for commercialization exploring a wide range of literature on the recent progress made by researchers on sodium ion battery technology the book provides valuable perspectives on designing better materials for sibs to unlock their practical capabilities a thorough introduction to sodium ion batteries including their key materials and likely future developments comprehensive explorations of design principles of electrode materials and electrolytes for sodium ion batteries practical discussions of cathode materials for sodium ion batteries including transition metal oxides polyanionic compounds prussian blue analogues and organic compounds in depth examinations of anode materials for sodium ion batteries including carbon based materials metal chalcogenides metal alloys phosphorus and na metal anodes perfect for materials scientists inorganic chemists electrochemists and physical chemists sodium ion batteries energy storage materials and technologies will also earn a place in the libraries of catalytic and polymer chemists

The New Testament, translated into the Cree language by Right Rev. John Horden, Bishop of Moosonee

1876

despite the availability of an effective vaccine there are still 400 million people worldwide who are chronically infected with hepatitis b virus hbv for them the vaccine as currently applied has no value given the possible consequences of hbv infection the number of those chronically infected with hbv presents an enormous public health challenge for example the major etiology of hepatocellular carcinoma hcc is chronic infection with hbv although fifth in cancer incidence worldwide hcc liver cancer is the third leading cause of cancer death the high mortality associated with hcc arises because the disease is often detected late and is unresponsive to treatment the number of deaths caused by hcc is expected to rise over the next 20 years those chronically infected with hbv have a life risk of death to hcc of between 10 and 25 even the limited efficacy of drugs for the treatment of chronic hbv helps underscore the point that this disease is responsive to therapy drugs that target the polymerase e.g. hepsera and lamivudine and interferon alpha represent two distinct strategies and show that both conventional antiviral and immunotherapeutic approaches can be used in management however the current inventory of therapeutics is inadequate interferon alpha is of limited value only parenterally available and fraught with adverse reactions
