the internationalization of legal services and the development of corporate law firms have led to profound changes in the practice of law giving it a more commercial and international focus these changes

coupled with a general intolerance of restrictions to competition have led governments to reconsider the way they regulate the profession liberalization of trade in legal services takes place both at the multilateral level within the world trade organization s general agreement on trade in services gats and at the regional level within preferential trade agreements ptas this book analyses the liberalization process that takes place at both levels it is the first publication to undertake an in depth analysis of the obligations contained in these agreements starting from an overview of the regulations related to legal services and focusing on barriers to cross border legal services that result from these regulations the analysis goes a long way towards pinpointing which regulations should be removed and which adopted or preserved in order to facilitate international trade in legal services insightful considerations explore the cross border features of such elements as the following cross border mergers and acquisitions intellectual property rights new financial instruments business to business dispute resolution mechanisms business permits company formation tax burdens regulatory compliance transparency rules residency and local presence requirements restrictions on e g ownership investment entry fee

setting and advertising and extension of accountancy disciplines to legal services noting that the most successful global law firms are not those that impose one single culture but rather those that harmonize many cultures around shared core values and a consistent approach to clients the author has produced a timely and far reaching work that is highly relevant for international legal practice it is sure to be warmly welcomed by legal practitioners government officials and policymakers in the legal services sector and advisors at governments and international organizations as well as by academics and researchers
