Candidates for the MRCPsych Part 2 often have difficulty with the basic sciences curriculum of the examination because it may have been several years since it was part of their studies. This book provides the information that will refresh and update their knowledge. It begins with ethics and the law and concludes with social sciences. In between are chapters on genetics, epidemiology, evaluation, and psychometrics and neuroscience. It can be used to provide an overview of the topics covered and as a revision aid prior to the examination. These essential notes will provide trainee psychiatrists.

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy
