reader through all the aspects of power production and high performance engine building his proven high performance engine building methods and techniques are revealed in this all new edition of how to build horsepower vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine the production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust explained is how to optimize all the components in between such as selecting heads for

maximum flow or port heads for superior power output ideal valvetrain components realizing the ideal rocker arm ratios for a particular application secrets for selecting the best cam and giving unique insight into all facets of cam performance in addition he covers how to select and setup superchargers nitrous oxide ignition and other vital aspects of high performance engine building
