Weapons and the Law of Armed Conflict 2016-03-10

bringing together the law of armed conflict governing the use of weapons into a single volume the fully updated second edition of weapons and the law of armed conflict interprets these rules and discusses the factors influencing future developments in weapons law after relating the historical evolution of weapons law the book discusses the important customary principles that are the foundation of the subject and provides a condensed account of the law that exists on the use of weapons the treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters having stated the law as it is the book then explores the way in which this dynamic field of international law develops in the light of various influences the legal review of weapons is discussed both from the perspective of how such reviews should be undertaken and how such a system should be established having stated the law as it is the book then investigates the way in which this dynamic field of international law develops in the light of various influences in the final chapter the prospects for future rule change are considered this second edition includes a discussion of new treaty law on expanding bullets the arms trade and norms in relation to biological and chemical weapons it also analyses the international manuals on air and missile warfare law and on cyber warfare law the challenges posed by lethal autonomous weapon systems and developments in the field of information and telecommunications otherwise known as cyber activities

□□□□□□ 1962

offering a comprehensive analysis of the human right to development and its realistic application in an era of economic globalization daniel aguirre provides a multidisciplinary overview of economic globalization and examines its challenges to the realization of human development he takes this further by engaging with these challenges and highlighting the human rights opportunities presented by economic globalization and the international investment system the volume proposes a triadic system of responsibility for human rights in development to include mapping the overlapping human rights responsibilities of corporations at the micro level of states at the macro level and of the international community at the meso level the scope of the book is broad and the approach to the subject is new it will generate interest across many disciplines including political science international law and economics activists academics and development practitioners in many fields should also read this book

Resources in Education 1992-06

world development indicators 2012 is a compilation of relevant high quality and internationally comparable statistics about development and the quality of people's lives organized around six themes world view people the environment the economy states and markets and global links it aims to put data into the hands of policy makers development specialists students and the public the full dataset used to produce world development indicators contains more than 1 000 indicators for 216 economies with many time series extending back to 1960 and as a major part of the world bank's open data initiative the data are freely available for use and reuse under an open license a companion printed volume the little data book 2012 presents a selection of indicators for each economy and the biennial statistics for small states presents data for less populated developing countries any assessment of the millennium development goals must acknowledge that amid all the signs of progress there are gaps some targets will not be reached in this decade or the next likewise the statistical record is still incomplete continuing progress will require renewed

commitment and careful monitoring

The Human Right to Development in a Globalized World 2021-12-16

cyber weapons and cyber warfare have become one of the most dangerous innovations of recent years and a significant threat to national security cyber weapons can imperil economic political and military systems by a single act or by multifaceted orders of effect with wide ranging potential consequences unlike past forms of warfare circumscribed by centuries of just war tradition and law of armed conflict prohibitions cyber warfare occupies a particularly ambiguous status in the conventions of the laws of war furthermore cyber attacks put immense pressure on conventional notions of sovereignty and the moral and legal doctrines that were developed to regulate them this book written by an unrivalled set of experts assists in proactively addressing the ethical and legal issues that surround cyber warfare by considering first whether the laws of armed conflict apply to cyberspace just as they do to traditional warfare and second the ethical position of cyber warfare against the background of our generally recognized moral traditions in armed conflict the book explores these moral and legal issues in three categories first it addresses foundational questions regarding cyber attacks what are they and what does it mean to talk about a cyber war the book presents alternative views concerning whether the laws of war should apply or whether transnational criminal law or some other peacetime framework is more appropriate or if there is a tipping point that enables the laws of war to be used secondly it examines the key principles of jus in bello to determine how they might be applied to cyber conflicts in particular those of proportionality and necessity it also investigates the distinction between civilian and combatant in this context and studies the level of causation necessary to elicit a response looking at the notion of a proximate cause finally it analyses the specific operational realities implicated by particular regulatory regimes this book is unmissable reading for anyone interested in the impact of cyber warfare on international law and the laws of war

this book examines the obligations of troops to prevent serious abuses of human rights towards civilians under international humanitarian law and international human rights law it analyses the duty to intervene to stop the commission of serious abuses of human rights by analysing the meaning and practical consequences for troops in terms of civilian protection of the article 1 duty to respect and ensure respect for the geneva conventions of the duty to secure human rights found in most international human rights treaties and of the duty to restore law and order in an occupation the book also analyzes the extent of troops obligations to provide protection in light of various different operational and legal contexts in and discusses grey areas and lacuna of coverage a discussion of whether new approaches are needed for example where operations are undertaken explicitly to protect people from serious violations of their human rights follows and the book concludes by offering some guidelines for troops faced with such violations

Cyber War 2015-03-19

feeding our globally expanding population is one of the most critical challenges of our time and improving food and agricultural production efficiencies is a key factor in solving this problem currently one third of food produced for humans is wasted and for every pound of food produced roughly an equal amount of nonfood by product is also generated creating a significant environmental impact in integrated processing technologies for food and agricultural by products experts from around the world present latest developments recognizing that while some by products have found use as animal feed or are combusted for energy new technologies which integrate conversion of production and processing by products into higher value food or nonfood products nutraceuticals chemicals and energy resources will be a critical part of the transition to a more sustainable food system organized by agricultural crop and focusing on those crops with maximum economic impact each chapter describes technologies for value added processing of by products which can be integrated into current food production systems integrated processing technologies for food and agricultural by products is a valuable resource for industry professionals academics and policy makers alike provides production through processing coverage of key agricultural crops for a thorough understanding and translational inspiration describes and discusses major by product sources including physical and chemical biomass characterizations and associated variability in detail highlights conversions accomplished through physical biological chemical or thermal methods and demonstrates examples of those technologies

Monthly Catalogue, United States Public Documents 1924

this title was first published in 2003 the events of 11 september 2001 defy modern economic theory when addressed in aviation terms economic theory would suggest that once the impact of such events are a thing of the past and economies are restored to their status quo ante a rise in the gross domestic product of states to earlier levels would almost inevitably result in increased consumption this in turn would mean that the demand for air travel would rise to earlier proportions and consumption in terms of air transport services would be restored to normalcy however the september attacks on united states property introduced a unique characteristic through the fear factor that directly impacts the future development of air transport as a result the grim task of restoration of passenger confidence stands in the way of economic revival of the air transport industry aviation was always in crisis the air transport industry even prior to 11 september 2001 although seemingly a glamorous exciting and prosperous business never enjoyed sustained periods of profitability even among the large carriers a short bout of profitability would inevitably be followed by a period of downturn in real income it is simply that this fluctuation in fortune is an ineluctable characteristic of air transport whose fortunes are dictated by rigid regulation competition and technological change if a sustained analysis were to be made of air transport plain economic theory would no longer be the exclusive discipline for consideration rather all relevant factors have to be taken in context and emerging issues should be analyzed as possible threats to the economic well being of the air transport industry this book addresses issues in a post september 2001 context but also analyses issues past and present with the intent of looking at the future four major areas are taken into consideration which were in crisis but are truly impacted by the events of september 2001 these areas relate to crises in the commercial security insurance and environmental protection fields of these the first and fourth areas are inextricably intertwined as aircraft noise regulations in various states have a direct impact on aircraft financing which in turn is linked to demand for air services a drop in demand for air services would essentially mean that the demand for lease or purchase of new aircraft would drop when this occurs air transport enterprises would be more

inclined to cut costs and therefore concentrate on using the aircraft already at hand upgrading them to conform to the the purpose of this book is to view the overall picture of an aviation industry comprising air transport and other aviation related industries in crisis through issues that continue to impact the economic viability of air transport particularly as a result of the events of 11 september 2001

Protecting Civilians 2009-02-26

this new fifth edition of information resources in toxicology offers a consolidated entry portal for the study research and practice of toxicology both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment the editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology s subdisciplines this edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools due to the increasing size of the hardcopy publication the current edition has been divided into two volumes to make it easier to handle and consult volume 1 background resources and tools arranged in 5 parts begins with chapters on the science of toxicology its history and informatics framework in part 1 part 2 continues with chapters organized by more specific subject such as cancer clinical toxicology genetic toxicology etc the categorization of chapters by resource format for example journals and newsletters technical reports organizations constitutes part 3 part 4 further considers toxicology s presence via the internet databases and software tools among the miscellaneous topics in the concluding part 5 are laws and regulations professional education grants and funding and patents volume 2 the global arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field the book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children s environmental health opens with an overview of the international toxicology scene organizations and activities involved with both the science and regulatory framework and a specific look at the european union s efforts offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals organizations professional societies universities poison control centers legislation and online databases provides the second edition of the international union of pure and applied chemistry s glossary of terms used in toxicology a carefully constructed and peer reviewed collation of critical terms in the science concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture paired with volume one which offers chapters on a host of toxicology sub disciplines this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

the comprehensive six in one package small business entrepreneurs can't afford to be without with more Canadians considering starting their own small businesses than ever before there's never been a greater need for a detailed comprehensive guide to help budding entrepreneurs get off the ground comprised of six books in one that

cover every aspect of running a business from developing a business plan to managing growth successfully and everything in between starting and running a small business for Canadians for Dummies all in one will ensure readers ventures meet with success the ideal resource for the first time entrepreneur in a market when small businesses are growing fast provides a wealth of management advice based on recent research that shows that when small businesses are successful they hire includes the financial advice that keeps new businesses from folding within their first five years offering Canadians everything they need to know about starting their own companies within Canada this six book compilation is essential reading for anyone looking to make it big in the world of small business

Integrated Processing Technologies for Food and Agricultural By-Products 2019-07-13

this handbook is a new systematic approach to engineering documentation therefore it will simplify the end users ability to set up or enhance their engineering documentation requirements companies with small manual systems to large scale mass production facilities can use this handbook to tailor their engineering documentation requirements if an individual or company wishes to create or improve an engineering documentation system there is no need to start from scratch instead use this new handbook complete with 47 specially designed forms and with procedures that cover every major aspect of a comprehensive engineering documentation system another book published by Noyes Engineering Documentation Control Handbook can be very helpful if used in conjunction with this handbook this book contains 62 engineering procedures and 27 forms most of these engineering procedures are influenced by the author's background in aircraft aerospace and the computer industry the manufacture of printed circuit boards was used as an example throughout the book however the principles are applicable to all engineering and operational disciplines

Aviation in Crisis 2017-11-22

as of the end of 2015 there were 40.8 million civilians who had been internally displaced by conflicts and effects of natural disasters in various parts of the world internally displaced persons (IDPs) are currently the largest group of persons receiving assistance from some of the main international humanitarian organisations with the largest concentration of internally displaced persons (IDPs) the African continent has been the worst affected region while previously IDPs have largely been neglected under international law the first ever continental binding treaty on internal displacement the African Union Convention on the Protection of and Assistance to Internally Displaced Persons the Kampala Convention entered into force on 6 December 2012 as of January 2016 25 states have ratified the instrument while 40 states have become signatories this book significantly contributes to the study policy making and practice on managing internal displacement by presenting the first major systematic examination of the evolution elements and implementation of the Kampala Convention it explores the responsibility of the state for the protection of IDPs particularly those who are most vulnerable during armed conflicts internal strife natural disasters human rights violations and other circumstances the status of ratification of the convention is reviewed as well as the steps currently being undertaken by governments to implement the convention it also analyses the contribution by human rights mechanisms inter governmental bodies and UN peace keeping missions in the implementation of the convention the book casts the Kampala Convention in broader institutional and normative developments in Africa and beyond it demonstrates how concepts such as responsibility to protect and sovereignty as responsibility have begun to make inroads influencing some of the more progressive

instruments adopted by the african union it also sheds light on the relationship between the convention and some regional instruments in assessing the effectiveness of the kampala convention allehone abebe argues that the link between the convention and initiatives on development human rights and governance in africa should be fully fostered

Information Resources in Toxicology, Volume 2: The Global Arena 2020-05-15

while western democracies insist upon a mainenance of their freedom of speech security and wealth an increasing number of the world s inhabitants are under threat of poverty famine and war the contributors to this volume argue for an extension of democratic values to the sphere of international relations
