introduction to probability and statistics mit opencourseware Oct 13 2023 [?][?][?]

this course provides an elementary introduction to probability and statistics with applications topics include basic combinatorics random variables probability distributions bayesian inference hypothesis testing confidence

introduction to probability open textbook library Sep 12 2023 [?][?][?] 2018[?]12[?]13[?]

each chapter contains realistic examples that apply probability theory to basic statistical inference and naturally connect to the monte carlo simulations and graphical illustration of the probability distributions and probability

theory of probability mathematics mit opencourseware Aug 11 2023 [?][?][?] this

course covers topics such as sums of independent random variables central limit phenomena infinitely divisible laws levy processes brownian motion conditioning and martingales
