FENet Meeting Proceedings 2005

provides a single record of technologies and practices of the semantic approach to the management organization interpretation retrieval and use of based data

The Semantic Web for Knowledge and Data Management 2008-08-31

the 13th international conference on human computer interaction hci international 2009 was held in san diego california usa july 19 24 2009 jointly with the symposium on human interface japan 2009 the 8th international conference on engineering psychology and cognitive ergonomics the 5th international conference on universal access in human computer interaction the third international conference on virtual and mixed reality the third international conference on internationalization design and global development the third international conference on online communities and social computing the 5th international conference on augmented cognition the second international conference on digital human modeling and the first international conference on human centered design a total of 4 348 individuals from academia research institutes industry and governmental agencies from 73 countries submitted contributions and 1 397 papers that were judged to be of high scientific quality were included in the program these papers discuss the latest research and development efforts and highlight the human aspects of the design and use of computing systems the papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas

International Congress Calendar 2000

this important reference volume covers developments in aspects of british library and information work during the five year period 2001 2005 over forty contributors all of whom are experts in their subject provide an overview of their field along with extensive further references which act as a starting point for further research the book provides a comprehensive record of library and information management during the past five years and will be essential reading for all scholars library professionals and students

Human Centered Design 2009-07-14

this volume presents eight carefully revised texts from selected lectures given by leading researchers at the second central european functional programming school cefp 2007 held in cluj napoca romania in june 2007 the eight revised full papers presented were carefully selected during two rounds of reviewing and improvement for inclusion in the book the lectures cover a wide range of topics such as interactive workflows lazy functional programs lambda calculus and object oriented functional programming

British Librarianship and Information Work 2001-2005 2016-04-15

this book constitutes the refereed proceedings of hci and usability for e inclusion held as the 5th symposium of the workgroup human computer interaction and usability engineering of the austrian computer society usab 2009 in linz austria in november 2009 the 12 revised full papers and 26 revised short papers presented were carefully reviewed and selected from 60 submissions the papers are organized in topical sections on gender and cognitive performance usefulness usability accessibility emotion confidence and elderly usability testing evaluation measurement education learning and e inclusion design for adaptive content processing

grounded theory activity theory and situated action smart home health and ambient assistent living user centred design and usability practice interaction assistive technologies and virtual environments communication interfaces and haptic technology as well as new technologies and challenges for people with disabilities

HCI and Usability for e-Inclusion 2009-11-06

this book contains the refereed proceedings of the 12th international conference on business process modeling development and support bpm4ds 2011 and the 16th international conference on exploring modeling methods for systems analysis and design emmsad 2011 held together with the 23rd international conference on advanced information systems engineering caise 2011 in london uk in june 2011 the 22 papers accepted for bpm4ds were selected from 61 submissions and cover a wide spectrum of issues related to business processes development modeling and support they are grouped into sections on bpm4ds in practice business process improvement business process flexibility declarative process models variety of modeling paradigms business process modeling and support systems development and interoperability and mobility the 16 papers accepted for emmsad were chosen from 31 submissions and focus on exploring evaluating and enhancing current information modeling methods and methodologies they are grouped in sections on workflow and process modeling extensions requirements analysis and information systems development requirements evolution and information systems evolution data modeling languages and business rules conceptual modeling practice and enterprise architecture

Hearing on the Nominations of Michael Dourson, Matthew Leopold, David Ross, and William Wehrum to be Assistant Administrators of the Environmental Protection Agency and Jeffery Baran to be a Member of the Nuclear Regulatory Commission 2017

this book brings policy making for sustainable development into the mainstream of decision making at all levels of governance and in all sectors it builds on the 2005 internationally agreed mauritius strategy which aims to implement the integration of sustainable development by small island developing states designed as a handbook for policy makers and planners in government as well as business and civil society leaders it covers seven of the twenty issues that have been outlined in the mauritius strategy as being important for the sustainable development of sids disaster management marine resources freshwater resources land resources energy resources tourism resources and trade it brings together best practices policy options and development prospects that small states can pursue in order to achieve real progress in these fields it covers the progress and experiences of countries in the caribbean region the pacific region and the atlantic indian ocean and mediterranean region in their implementation of sustainable development in these areas it also provides a useful point of reference and stimulus to policy makers and their supporting colleagues from all sectors

□□□□□□□□□□ 1 □□□□□□ 2012-04

this book is a comprehensive and in depth reference to the most recent developments in the field covering theoretical developments techniques technologies among others provided by publisher

Enterprise, Business-Process and Information Systems Modeling 2011-06-17

Julie Blyfield is one of Australia's leading contemporary jewellers. Her work has consistently kept pace with investigations of location identity and cross-cultural understanding and involves an innovative engagement with traditional jewellery and metalwork techniques sourced from all over the world.

Integrating Sustainable Development Into National Frameworks 2011

The second edition of this comprehensive handbook of computer and information security provides the most complete view of computer security and privacy available. It offers in-depth coverage of security theory, technology, and practice as they relate to established technologies as well as recent advances. It explores practical solutions to many security issues. Individual chapters are authored by leading experts in the field and address the immediate and long-term challenges in the authors' respective areas of expertise. The book is organized into 10 parts, comprised of 70 contributed chapters by leading experts in the areas of networking and systems security, information management, cyber warfare, and security encryption technology. Privacy, data storage, physical security, and a host of advanced security topics new to this edition are chapters on intrusion detection, securing the cloud, securing web apps, ethical hacking, cyber forensics, physical security, disaster recovery, cyber attack deterrence, and more. Chapters by leaders in the field on theory and practice of computer and information security technology allow the reader to develop a new level of technical expertise. Comprehensive and up-to-date coverage of security issues allows the reader to remain current and fully informed from multiple viewpoints. Presents methods of analysis and problem-solving techniques, enhancing the reader's grasp of the material and ability to implement practical solutions.

Encyclopedia of Artificial Intelligence 2009-01-01

This book constitutes the refereed proceedings of the Third International Conference on Autonomous and Trusted Computing (ATC 2006) held in Wuhan, China, in September 2006. The 57 revised full papers presented together with two keynote papers were carefully reviewed and selected from 208 submissions. The papers are organized in topical sections.

Julie Blyfield 2007

This volume and its companion volume LNAI 4441 constitute a state-of-the-art survey in the field of speaker classification. Together they address such intriguing issues as how speaker characteristics are manifested in voice and speaking behavior. The nineteen contributions in this volume are organized into topical sections covering fundamentals, characteristics, applications, methods, and evaluation.

Computer and Information Security Handbook 2012-11-05

This book discusses the need for national space legislation in India in the wake of private stakeholders entering the field and the expansion of outer space activities, highlighting India's commitment to responsibly pursuing its outer space ambitions through rule of law. The book discusses the rationale behind national space legislation and addresses the requirements of both international and domestic law in order to suggest a draft framework for national space legislation for India. It examines and compares the legislations of twenty major space-faring countries to identify the best practices. One of the few scientific studies in India that proposes

draft framework legislation for space activities in india this book summarizes the three main reasons why national space legislation is necessary to fulfill international obligations to address india s specific requirements and to enable non governmental entities to participate a must read for anyone interested in international space law and india s role and responsibility toward it it is a valuable resource for academics scientists policymakers industry executives lawyers and students as well as amateur space enthusiasts

Autonomic and Trusted Computing 2006-08-25

this book constitutes the refereed proceedings of the 11th international conference on user modeling um 2007 held in corfu greece in july 2007 coverage includes evaluating user student modeling techniques data mining and machine learning for user modeling user adaptation and usability modeling affect and meta cognition as well as intelligent information retrieval information filtering and content personalization

Speaker Classification I 2007-08-28

presents the state of the technology and points to future directions for semantic computing semantic computing a rapidly evolving interdisciplinary field seeks to structure design and manipulate computer content to better satisfy the needs and intentions of users and create a more meaningful user experience this remarkable contributed work examines the art engineering technology and applications of the field moreover it brings together researchers from such disciplines as natural language processing software engineering multimedia semantics semantic signal processing and pattern recognition in order to provide a single source that presents the state of the technology and points to new breakthroughs on the horizon semantic computing begins with an introduction that explores the concepts technology applications and future of semantic computing next the book is divided into four parts part one semantic analysis part two semantic languages and integration part three semantic applications part four semantic programming and interface as readers progress through the book they ll learn not only the underlying science but also the fundamental technological building blocks of semantic computing moreover they ll discover a variety of cross disciplinary solutions to current computing and communication problems throughout the book references to the primary literature enable further investigation of each individual topic semantic computing is ideal for industrial managers researchers and engineers seeking to design the next generation of computing systems in order to better meet user needs it is also recommended as a textbook for senior undergraduate and graduate level semantic computing courses

Forest Management on Alluvial and Colluvial Fans 2006

this book constitutes the refereed proceedings of the 19th international conference on algorithmic learning theory alt 2008 held in budapest hungary in october 2008 co located with the 11th international conference on discovery science ds 2008 the 31 revised full papers presented together with the abstracts of 5 invited talks were carefully reviewed and selected from 46 submissions the papers are dedicated to the theoretical foundations of machine learning they address topics such as statistical learning probability and stochastic processes boosting and experts active and query learning and inductive inference

National Space Legislation for India 2020-01-23

this book reviews problems issues and presentations of the newest research in the field of cyberwarfare and cyberterrorism while enormous efficiencies have been gained as a result of computers and telecommunications technologies use of these systems and networks translates into a major concentration of information resources creating a vulnerability to a host of attacks and exploitations provided by publisher

User Modeling 2007 2007-08-28

welcome to the proceedings of the 2005 ifip international conference on bedded and ubiquitous computing euc 2005 which was held in nagasaki japan december 6 9 2005 embedded and ubiquitous computing is emerging rapidly as an exciting new paradigm to provide computing and communication services all the time erywhere its systems are now pervading every aspect of life to the point that they are hidden inside various appliances or can be worn unobtrusively as part of clothing and jewelry this emergence is a natural outcome of research and technological advances in embedded systems pervasive computing and c munications wireless networks mobile computing distributed computing and agent technologies etc its tremendous impact on academics industry gove ment and daily life can be compared to that of electric motors over the past century in fact it but promises to revolutionize life much more profoundly than elevators electric motors or even personal computers the euc 2005 conference provided a forum for engineers and scientists in academia industry and government to address profound issues including te nical challenges safety and social legal political and economic issues and to present and discuss their ideas results work in progress and experience on all aspects of embedded and ubiquitous computing

Semantic Computing 2011-07-05

this book constitutes the refereeds proceedings of the international conference on high performance architecture and grid computing hpagc 2011 held in chandigarh india in july 2011 the 87 revised full papers presented were carefully reviewed and selected from 240 submissions the papers are organized in topical sections on grid and cloud computing high performance architecture information management and network security

Algorithmic Learning Theory 2008-09-29

this book constitutes the refereed proceedings of the 4th international conference on social robotics icsr 2012 held in chengdu china in october 2012 the 66 revised full papers were carefully reviewed and selected from numerous submissions the papers are organized in topical sections on affective and cognitive sciences for socially interactive robots situated interaction and embodiment robots to assist the elderly and persons with disabilities social acceptance of robots and their impact to the society artificial empathy hri through non verbal communication and control social telepresence robots embodiments and networks interaction and collaboration among robots humans and environment human augmentation rehabilitation and medical robots i and ii

Lok Sabha Debates 2003-08

this book constitutes the refereed proceedings of the ieee international conference on intelligence and security informatics isi 2006 gathers 39 revised full papers 30 revised short papers and 56 extended poster abstracts organized in topical sections including intelligence analysis and knowledge discovery access control privacy and cyber trust surveillance and emergency response infrastructure protection and cyber security terrorism informatics and countermeasures surveillance bioterrorism and emergency response

UNCRD Newsletter 1997

this book constitutes the refereed proceedings of the 11th international conference on applications of natural language to information systems nldb 2006 held in

klagenfurt austria in may june 2006 as part of uniscon 2006 the book presents 17 revised full papers and 5 revised short papers organized in topical sections on concepts extraction and ontology ontologies and task repository utilization query processing information retrieval and dialog processing and nlp techniques

Cyber Warfare and Cyber Terrorism 2007-05-31

this book constitutes the refereed proceedings of the 17th european symposium on programming esop 2008 held in budapest hungary in march april 2008 as part of etaps 2008 the european joint conferences on theory and practice of software the 25 revised full papers presented together with the abstract of one invited talk and two tool presentations were carefully reviewed and selected from 104 submissions and address fundamental issues in the specification analysis and implementation of programming languages and systems the papers are organized in topical sections on static analysis security concurrency and program verification

Embedded and Ubiquitous Computing - EUC 2005 2005-11-24

this book deals with the problem of detecting and localizing multiple simultaneously active wideband acoustic sources by applying the notion of wavefield decomposition using circular and spherical microphone arrays a rigorous derivation of modal array signal processing algorithms for unambiguous source detection and localization as well as performance evaluations by means of measurements using an actual real time capable implementation are discussed

High Performance Architecture and Grid Computing 2011-07-05

the is a global information space consisting of linked documents and linked data as the continues to grow and new technologies modes of interaction and applications are being developed the task of the semantic is to unlock the power of information available on the into a common semantic information space and to make it available for sharing and processing by automated tools as well as by people right now the publication of large datasets on the the opening of data access interfaces and the encoding of the semantics of the data extend the current human centric now the semantic community is tackling the challenges of how to create and manage semantic content how to make semantic applications robust and scalable and how to organize and integrate information from different sources for novel uses to foster the exchange of ideas and collaboration the international semantic conference brings together researchers and practitioners in relevant disciplines such as artificial intelligence databases social networks distributed computing engineering information systems natural language processing soft computing and human computer interaction this volume contains the main proceedings of iswc 2008 which we are cited to offer to the growing community of researchers and practitioners of the semantic we got a tremendous response to our call for research papers from a truly international community of researchers and practitioners from 41 countries submitting 261 papers each paper received an average of 3

Social Robotics 2012-11-04

the refereed post proceedings of the international conference on computational intelligence and security are presented in this volume the 116 papers were submitted to two rounds of careful review papers cover bio inspired computing evolutionary computation learning systems and multi agents cryptography information processing and intrusion detection systems and security image and signal processing and pattern recognition

Intelligence and Security Informatics 2006-05-10

global aquaculture production has grown rapidly over the last 50 years it is generally accepted that there is limited potential to increase traditional fisheries since most fish stocks are well or fully exploited consequently increased aquaculture production is required in order to maintain global per capita fish consumption at the present level fish farming enables greater control of product quality and safety and presents the possibility of tailoring products according to consumer demands this important collection reviews safety and quality issues in farmed fish and presents methods to improve product characteristics the first part of the book focuses on chemical contaminants chemical use in aquaculture and farmed fish safety after an opening chapter discussing the risks and benefits of consumption of farmed fish subsequent contributions consider environmental contaminants pesticides drug use and antibiotic resistance in aquaculture part two addresses important quality issues such as selective breeding to improve flesh quality the effects of dietary factors including alternative lipids and proteins sources on eating quality microbial safety of farmed products parasites flesh colouration and off flavours welfare issues and the ethical quality of farmed products are also covered the final part discusses ways of managing of product quality with chapters on haccp monitoring and surveillance authenticity and product labelling with its distinguished editor and international team of contributors improving farmed fish quality and safety is a standard reference for aquaculture industry professionals and academics in the field reviews safety and quality issues in farmed fish and presents methods to improve product characteristics discusses contaminants persistent organic pollutants and veterinary drug residues and methods for their reduction and control addresses important quality issues genetic control of flesh characteristics and the effects of feed on product nutritional and sensory quality

Natural Language Processing and Information Systems 2006-07-04

this book questions the practices in the policy processes of international institutions it looks at the formal and informal practices that are routinely undertaken as part of the structure of international policy processes and analyses how people behave and with what outcome for international environmental governance

Programming Languages and Systems 2008-03-18

in today s networked societies a key factor of the social and economic success is the capability to exchange transfer and share knowledge this book provides research on the topic providing a foundation of an emerging and multidisciplinary field provided by publisher

Modal Array Signal Processing: Principles and Applications of Acoustic Wavefield Decomposition 2007-05-10

the united nations documents index covers documents and publications issued by united nations offices worldwide the publication indexes a wide variety of documentation such as major reports and studies resolutions and decisions draft resolutions and meeting records including documents of restricted distribution the information in this publication is arranged in the following nine sections documents and publications official records sales publications united nations maps included in un documents united nations sheet maps united nations document series symbols author index title index and subject index

Examining the Current State of Cosmetics 2013

this book constitutes the refereed proceedings of the first european conference on smart sensing and context eurossc 2006 held in enschede netherlands in october 2006 the 15 revised full papers and 14 revised short papers presented were carefully reviewed and selected from over 50 submissions
