My Revision Notes: City & Guilds Level 2 Technical Certificate in Electrical Installation (8202-20) 1860 merit based tests and contests

have become popular methods for allocating rewards from trophies to contracts jobs to grants admissions to licenses with origins in jurisprudence methods of rewarding merit seem fairer than those rewarding political or social connections bribery aggression status or wealth because of this merit based competitions are well suited to the societal belief that people should be rewarded for what they know or do and not for who they know or are however judging merit is rarely an easy task it is prone to a variety of biases and errors small biases and errors especially in large competitions can make large differences in who or what is rewarded it is important then to learn how to spot flaws in procedures for judging merit and to correct them when possible based on over 20 years of theory and research in human judgment decision making and social psychology this unique book brings together for the first time what is known about the processes and problems of judging merit and their consequences it also provides practical suggestions for increasing the fairness of merit based competitions and examines the future and limits of these competitions in society

Directory of Educational and Training Opportunities in Fisheries and Aquaculture 1890 this book explores new and distinctive forms of higher vocational education across the globe and asks how the sector is changing in response to the demands of the 21st century these new forms of education respond to two key policy concerns an emphasis on high skills as a means to achieve economic competitiveness and the promise of open access for adults hitherto excluded from higher education examining a range of geographic contexts the editors and contributors aim to address these contexts and highlight various similarities and differences in developments they locate their analyses within the various political and socio economic contexts which can make particular reforms possible and achievable in one context and almost unthinkable in another ultimately the book promotes a critical understanding of evolving provisions of higher vocational education refusing assumptions that policy borrowing from apparently successful countries offers a straightforward model for others to adopt
