to reconcile these contradictory ideologies that explains germany s disastrous policies during world war ii this wide ranging study also contributes to the debates over several other aspects of german history including german military aims in world war ii the continuity or discontinuity of german policy from bismarck to hitler and the relation between ideology and social political life a compelling exploration of one of the most ill advised and calamitous interventions in colonial development history the palgrave encyclopedia imperialism and anti imperialism objectively presents the prominent themes epochal events theoretical explanations and historical accounts of imperialism from 1776 to the present it is the most historically and academically comprehensive examination of the subject to date contemporary social science is a product of the capitalist world system and eurocentrism is constitutive of the geoculture of this system characterized by the parochiality of its universalism assumptions about the superiority of western civilization and imposition as the sole theory of global progress the creation of these structures of knowledge specifically the institutionalization of the social sciences is a phenomenon that is inextricably linked to the very formation and maturation of europe s capitalist world system or imperialism there is therefore nothing that is natural logical or accidental about the institutionalization of the social sciences these europeanized structures of knowledge are imposed ways of producing knowledge of the world this eurocentrism of social science has justifiably come under increasingly vigorous scrutiny especially in the period since 1945 with the formal decolonization of africa asia and much of the caribbean this book forcefully argues that if social science is to make any progress in the twenty first century it must overcome its eurocentric heritage that has distorted social analyses and its capacity to deal with the problems of the contemporary world and embrace other non western funds of knowledge production an examination of how european imperialism was facilitated and challenged from 1820 to 1920 with reference to geographical science the authors add to multi disciplinary debates on the complex cultural ideological and intellectual bases of european imper europe s rapacious hunger for other people s lands is one of the key shaping forces of our contemporary world everything is touched by our colonial past from the way we see the world to the food we eat our contemporary preoccupations and ills from globalization to humanitarian intervention to international terrorism have colonialism somewhere in their genetic make up the character and policies of contemporary international organizations from the united nations to the european union have also been deeply affected by the colonial inheritance of their members whether as perpetrators or victims weaving together the complex strands of history and politics into one compact narrative this book addresses the key theories of colonialism examining them against contemporary realities it goes on to looks at how the different policies of colonisers have had profoundly contradictory effects on the way different empires ended in the 20th century these endings in turn affected the entire nature of modern day international relations it also exposes the moral ambiguities of colonialism and the hypocrisies which underlay colonial policies in the 19th and 20th centuries 500

and whose competing definitions arose out of political struggle and conflict imperialism and its close ally colonialism are two such contested concepts this set will give readers an insight in to the main lines of debate about the meanings of imperialism and colonialism over the last two centuries this narrative of the recent history of iraq describes the transformations within the country placing the people of iraq at the centre of the changes which began with the invasion of kuwait in 1990 and ended with the american occupation in the mid 1990s a comprehensive survey of capitalism s colonialist roots and uncertain future those who control the world s commanding economic heights buttressed by the theories of mainstream economists presume that capitalism is a self contained and self generating system nothing could be further from the truth in this pathbreaking book winner of the paul a baran paul m sweezy memorial award radical political economists utsa patnaik and prabhat patnaik argue that the accumulation of capital has always required the taking of land raw materials and bodies from noncapitalist modes of production they begin with a thorough debunking of mainstream economics then looking at the history of capitalism from the beginnings of colonialism half a millennium ago to today s neoliberal regimes they discover that over the long haul capitalism in order to exist must metastasize itself in the practice of imperialism and the immiseration of countless people a few hundred years ago write the patnaiks colonialism began to ensure vast virtually free markets for new products in burgeoning cities in the west but even after slavery was generally abolished millions of people in the global south still fell prey to the continuing lethal exigencies of the marketplace even after the second world war when decolonization led to the end of the so called golden age of capitalism neoliberal economies stepped in to reclaim the global south imposing drastic austerity measures on working people but say the patnaiks this neoliberal economy which lives from bubble to bubble is doomed to a protracted crisis in its demise we are beginning to see finally the transcendence of the capitalist system this account of imperialism explores recent intellectual theoretical and conceptual developments in imperial history including interdisciplinary and post colonial perspectives exploring the links between empire and domestic history it looks at the interconnections and comparisons between empire and imperial power within wider developments in world history covering the period from the roman to the present american empire the book begins by examining the nature of empire then looks at continuity and change in the historiography of imperialism and theoretical and conceptual developments it covers themes such as the relationship between imperialism and modernity culture and national identity in britain suitable for undergraduates taking courses in imperial and colonial history these stimulating essays reassess the meaning of british imperialism in the nineteenth and twentieth centuries they are written by leading authorities in the field and range in scope from the aftermath of the american revolution to the liquidation of the british empire from the caribbean to the pacific from sues to hong kong is the church merely a western institution where does christianity fit in with chinese identity does chinese evangelism detract from chinese culture this collection of essays addresses christian evangelism within a historical context to china s diverse character and explores prejudices and reactions to the evangelical movement throughout china the contributors of this volume are committed to the belief that evangelicalism continues to have the historical assets and intellectual hermeneutical and theological tools able to contribute to the global church british imperial history can now be seen as a bridge to global history this study tries to renew the debate on british imperialism by combining western and asian historiography and constructing a new global history as an aid to the understanding of globalization in the late twentieth and twenty first centuries part

one takes a predominantly metropolitan view of the globalizing forces unleashed by british imperialism part two focuses on the international order of east asia and its connection with gentlemanly capitalism how does control of media resources serve political and economic ends what is the impact of media concentration and monopoly in the era of technology convergence with not just traditional and new media but also consumer electronics telephony and computing industries revisiting the classic concept of media imperialism oliver boyd barrett presents a thorough retake for the 21st century arguing for the need to understand media and empires and how structures of power and control continue to regulate our access to and consumption of the media it s no longer just disney and dallas it s also now alibaba apple facebook google samsung and huawei examining the interplay between communications industries and the hierarchies and networks of political corporate and plutocratic power in a globalized world the book explains the historical context of the relationship between media and imperialism contestation and collaboration among new media empires the passion for social justice that inspired the original theories of media and cultural imperialism and how it has been embraced by a new generation digging deeply into the global landscape and emerging media markets to explore how media power works across transnational boundaries this book gives a clear and sophisticated argument for why media imperialism still matters in the final years of the nineteenth century as a large scale movement of farmers and laborers swept much the country the united states engaged in an ostensibly anti colonial war against spain and a colonial war of its own in the philippines how one related to the other the nature of the activists involvement in foreign policy debates and the influence of these wars upon the prospects for domestic reform is what nathan jessen explores in populism and imperialism american reformers at the turn of the twentieth century have long been misrepresented as accomplices of empire rather as populism and imperialism makes clear they were imperialism s chief opponents and that opposition contributed to their ultimate defeat correcting the record jessen charts the fortunes of the populists through the nineteenth century s last decade he shows that contrary to the standard narrative populists remained powerful in west after the election of 1896 they only suffered their final political reverses in 1900 after being branded as unpatriotic traitors by their opponents in fact the populists and democrats in the west favored war with spain for humanitarian reasons some among them led the opposition to hawaiian annexation and as leaders of the anti imperialists in congress from 1899 on the occupation of the philippines jessen also addresses the little studied money power conspiracy theory that explains a key element of the populist worldview this theory linking european imperialism and the growing economic and political power of financiers stirred populist opposition to american imperialism as well populism and imperialism revises a critical chapter in us history and offers lessons for the present as well as insights into the nation s past

we live in a time of dynamic but generally regressive regime change a period in which major political transformations and a rollback of a half century of legislation are accelerated under conditions of a prolonged and deepening economic crisis and a worldwide offensive against the citizenry and the working class written by two of the world s leading left wing thinkers imperialism and capitalism in the twenty first century takes the form of a number of analytical probes into some of the dynamics of capitalist development and imperialism in contemporary conditions of a system in crisis it is too early to be definitive about the form that capitalism and imperialism and socialism might be or is taking as we are in but the early stages of a new developmental dynamic the conditions of which are too complex to anticipate or grasp in thought they

require a closer look and much further study from a critical development and marxist perspective the purpose of this book is to advance this process and give some form to this perspective in part i this booklet traces the post independence struggles in the united states for the realization of the ideals of the early enlightenment thinkers with particular emphasis on the practical struggles of the working class the mid nineteenth to the mid twentieth centuries origin and fates of the theories of charles darwin and karl marx in this country are seen through the ideological lenses of the various classes groups and individual we get glimpses of the practical objectives of the culturally influential religious revivals social darwinist movement and the current dunning down of the us population all of which had and have the support and or blessings of the corporate and political elite down through the decades in part ii the author presents a reappraisal mainly by academic marxists in the advanced capitalist states of the demise of soviet socialism and their alternatives for a non market socialism with transparency democratic participatory socialism it is the hope of this writer that the ideas within will seed more discussion on socialist theory and practice the growing body of research on interdisciplinarity has encouraged a more in depth analysis of the relations that hold among academic disciplines in particular the incursion of one scientific discipline into another discipline s traditional domain also known as scientific imperialism has been a matter of increasing debate following this trend scientific imperialism aims to bring together philosophers of science and historians of science interested in the topic of scientific imperialism and in particular interested in the conceptual clarification empirical identification and normative assessment of the idea of scientific imperialism thus this innovative volume has two main goals indeed the authors first seek to understand interdisciplinary relations emerging from the incursion of one scientific discipline into one or more other disciplines such as in cases in which the conventions and procedures of one discipline or field are imposed on other fields or more weakly when a scientific discipline seeks to explain phenomena that are traditionally considered proper of another discipline s domain secondly the authors explore ways of distinguishing imperialistic from non imperialistic interactions between disciplines and research fields the first sustained study of scientific imperialism this volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as science and technology studies sociology of science technology philosophy of science and history of science this collection focuses on the social consequences of neoliberal crises in latin america it includes a critical yet sympathetic analysis of ruling leftist governments in the region and discusses the larger constraints facing organized attempts to politically transform the americas lenin s texts breaking with eurocentrism in the socialist movement fired up by the outbreak of the first world war and outraged by the capitulation of most socialist parties to the demands of national bourgeoisies lenin sought to understand the deeper roots of the crisis of the world movement the result was imperialism the highest stage of capitalism which went on to become a core text for the international communist movement but lenin also sought to break with the eurocentrism of the socialist movement which tended to look down with disdain at or simply reject struggles for self determination especially among colonized peoples this volume with an introduction by the renowned abolitionist and anti imperialist theorist ruth wilson gilmore brings together the texts on imperialism and those on the national question to provide a window into lenin s global vision of revolution the title is derived from a study of hotspots around the world from october 2013 in africa the countries covered are south africa south sudan tunisia egypt and palestine in the european arena the main focus is on ukraine and the impact of two world powers on eastern europe president

obama s speech to west point recruits yields some ideas on foreign policy so does the document on us africa commercial agreement for the future the book also includes some discussion on the us s pivot to asia together these policies point to what some visualize as a new world order by 2010 a unipolar world has changed into a multi polar one which stresses the need to democratize international institutions for global stability

Gentlemanly Capitalism, Imperialism and Global History 2014-12-01

the growing body of research on interdisciplinarity has encouraged a more in depth analysis of the relations that hold among academic disciplines in particular the incursion of one scientific discipline into another discipline's traditional domain also known as scientific imperialism has been a matter of increasing debate following this trend scientific imperialism aims to bring together philosophers of science and historians of science interested in the topic of scientific imperialism and in particular interested in the conceptual clarification empirical identification and normative assessment of the idea of scientific imperialism thus this innovative volume has two main goals indeed the authors first seek to understand interdisciplinary relations emerging from the incursion of one scientific discipline into one or more other disciplines such as in cases in which the conventions and procedures of one discipline or field are imposed on other fields or more weakly when a scientific discipline seeks to explain phenomena that are traditionally considered proper of

another discipline's domain secondly the authors explore ways of distinguishing imperialistic from non imperialistic interactions between disciplines and research fields the first sustained study of scientific imperialism this volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as science and technology studies sociology of science technology philosophy of science and history of science
