iciar 2005 the international conference on image analysis and recognition was the second icar conference and was held in toronto canada icar is organized annually and alternates between europe and north america icar 2004 was held in porto portugal the idea of offering these conferences came as a result of discussion between researchers in portugal and canada to encourage collaboration and exchange mainly between these two countries but also with the open participation of other countries addressing recent advances in theory methodology and applications
 theresponsetothecallforpapersforicar2005wasencouraging from295 full papers submitted 153 were nally accepted 80 oral presentations and 73 posters the review process was carried out by the program committee membersandotherreviewers allareexpertsinvariousimageanalysisandrecognition areas each paper was reviewed by at least two reviewers and also checked by the conference co chairs the high quality of the papers in these proceedings is attributed rst to the authors and second to the quality of the reviews provided by the experts we would like to thank the authors for responding to our call andwewholeheartedlythankthe reviewersfor their excellentwork andfortheir timely response it is this collective effort that resulted in the strong conference program and high quality proceedings in your hands

Bibliography of Scientific and Industrial Reports 1948

the church of scientology is one of the most recognizable american born new religions but perhaps the least understood with academic and popular interest on the rise many books have been written about scientology and surely more will follow although academics have begun to pay more attention to scientology the subject has received remarkably little qualitative attention indeed no work has systematically addressed such questions as what do scientologists themselves have to say about their religion s history theology and practices how does scientology act as a religion for them what does lived religion look like for a scientologist this is not so much a book about the church of scientology its leaders or its controversies as it is a compilation of narratives and histories based on the largely unheard or ignored perspectives of scientologists themselves drawing on six years of interviews fieldwork and research conducted among members of the church of scientology this groundbreaking work examines features of the new religion s history theology and praxis in ways that move discussion beyond apostate driven and expos accounts
