The former are partnered together in a war against the latter, and that's how it's always been or has it? Winston Smith works for the Ministry of Truth. His job is to alter the history books so they line up with whatever the Party wants its citizens to believe. Everything is controlled by the Party, including language. Those that dare to have free thought are dealt with severely. Winston begins to question the Party and how things are run. He starts to rebel by purchasing a diary to write his thoughts in, beginning a relationship with a mysterious, dark-haired woman, and seeking out the Brotherhood, who would like to see the Party taken down. Just fifty years ago, Julian Huxley, the biologist, grandson of Thomas Henry Huxley, published a book which easily could be seen to represent the prevailing outlook among young scientists of the day. If I were a dictator, 1934, the outlook is optimistic, the tone playfully rational, the intent clear: allow science a free hand and through rational planning it could bring order out of the surrounding social chaos. He complained, however, at the moment, science is for most part either an intellectual luxury or the paid servant of capitalist industry or the nationalist state. When it and its results cannot be fitted into the existing framework, it and they are ignored, and furthermore, the structure of scientific research is grossly lopsided, with over-emphasis on some kinds of science and partial or entire neglect of others. pp. 83-84. All this, the scientist-dictator would set right. A new era of scientific humanism would provide alternative visions to the traditional religions with their gods and the civic religions such as Nazism and Fascism. Science in Huxley's version carries in it the twin impulses of the utopian imagination: power and order. Of course, it was exactly this vision of science which led that other grand son of Thomas Henry Huxley, the writer Aldous Huxley, to portray scientific discovery as potentially subversive and scientific practice as ultimately enslaving. neglected the literary or fictional dimension of utopia the reason for such neglect may be that earlier utopian fictions tended to be written by what one would nowadays call social scientists e g plato or sir thomas more that is also why earlier discussions of utopian fiction were usually written by critics trained in the social sciences rather than by critics trained in literature to an appreciable degree this still tends to be the case today now however there is an additional difficulty for the social scientists are critiquing utopias written by people who are primarily literary for example krishan kumar on wells or bernard crick on orwell inevitably much of importance of literary importance is simply disregarded and so our understanding of modern utopia is correspondingly diminished this book aims to put the fiction back into utopian fictions while tracing the development of fiction in the writing of modern utopias especially in britain it seeks to demonstrate in specific ways how those utopias have become increasingly literary possibly as a reaction not only against the social scientification of modern utopias but also in reaction against the modern attempt to institute utopia in reality notably in the former soviet union but also in consumerist late twentieth century america after an introductory discussion of how we understand and how we should understand modern utopian fictions the book provides several examples of how those understandings affect our appreciation of utopian fiction there are chapters on h g wells s time machine bernard shaw s major barbara aldous huxley s brave new world george orwell s animal farm and nineteen eighty four william golding s lord of the flies and iris murdoch s the bell about the author peter edgerly with especial focus on how humanists take ownership of and are empowered by technology in unexpected ways digital technology and the practices of humanities research is essential reading for scholars students and general readers interested in the changing culture of research practices in the humanities and in the future of the digital humanities on the whole the vast majority of kids in the
