Calculus textbook: Neutrosophy means the study of ideas and notions that are not true nor false but in between. I.e. neutral, indeterminate, unclear, vague, ambiguous, incomplete, contradictory, etc. Each field has a neutrosophic part, i.e. that part that has indeterminacy. Thus, there were born the neutrosophic logic, neutrosophic set, neutrosophic probability, neutrosophic statistics, neutrosophic measure, neutrosophic precalculus, neutrosophic calculus, etc. There exist many types of indeterminacies that is why neutrosophy can be developed in many different ways.
