Journalism in the digital era 2011-09-21 what s fair it is an old question in journalism in 1999 it seems more difficult to answer than ever the

cycle of story spin and counterspin that surrounds the white house is only the most obvious part of the problem in the past 25 years the practice of journalism has changed enormously particularly in the united states the demarcation of public and private life that once ruled certain kinds of stories out of bounds has eroded leaving reporters with the unenviable challenge of having to cover events whose seaminess inevitably taints all who touch them commercial pressures and a tidal wave of information and entertainment media have engulfed the news business leaving the definitions of journalism and journalistic standards vague and uncertain and the technology of news reporting is speeding up news cycles in ways that leave little time for sober and measured judgments what s fair is a collection of essays from experts in the field that are sure to spark compelling questions and ideas about journalism and its place in our time in fairness a struggle journalists explore a subject that they normally share only with close friends and colleagues their own struggles with fairness that occurred in places as different as south africa washington and the south bronx in fairness a history nine contributors examine the history of the fairness question specifically the establishment of the hutchins commission report of 1947 which is evaluated here by a historian a journalist and a first amendment authority in a comparative vein two authorities on international communications law examine british regulations for fairness in broadcasting at the end of the 20th century in fairness a goal contributors explore what struggles for fairness mean in a variety of contexts from american newsrooms to post communist poland to northern ireland many discussions of fairness are either numbingly abstract or impossibly righteous to avoid those hazards robert giles and robert snyder have grounded this volume in stories the kind of stories journalists tell each other and the kind of stories people tell about journalism this volume is a testament to journalism that is free yet fair probing yet credible and authoritative in content yet open to many voices robert giles is editor in chief of media studies journal senior vice president of the freedom forum and executive director of media studies center formerly the editor and publisher of the detroit news he is the author of newsroom management a guide to theory and practice robert w snyder is editor of the media studies journal a historian and most recently author of transit talk new york s bus and subway workers tell their stories he has taught at princeton university and new york university from which he holds a doctorate in history

Boundaries of Journalism 2015-03-05 donald trump might have been the loudest and most powerful voice maligning the integrity of news media in a generation but his unrelenting attacks draw from a stew of resentment wariness cynicism and even hatred toward the press that has been simmering for years at one time journalism s centrality in reporting and interpreting important events was relatively unquestioned

when a limited number of channels and voices produced a consensus based news environment the collapse of this environment has sparked a moment of reckoning within and outside journalism particularly as professional news outlets struggle to remain solvent alternative voices compete for attention with and criticize the work and motivations of journalists even as a growing number of journalists question their core norms and practices news after trump considers these struggles over journalism to be about the very relevance of journalism as an institutional form of knowledge production at the heart of this questioning is a struggle to define what truthful accounts look like and who ought to create them or determine them in a rapidly changing media culture through an extensive accounting of trump s relationship with the press and drawing on in depth interviews with journalists and textual analysis of news events editorials social media and trade press discussions the book rethinks the relevance of journalism by recognizing the limits of objectivity and the way in which journalism positions certain actors as authority figures while rendering the less socially powerful invisible or flawed this ethos of detachment has staved off vital questions about how journalism connects to its audiences how it creates enduring value in people s lives or not and how diversity needs to be understood jointly at the level of production reporting and audience in order to rebuild trust

What's Fair? 2018-04-17 we are living in a modern world where falsehood regularly seems to overwhelm truth the ability of billions of people to publish has created a vast amount of unreliable and false news which now competes with and sometimes drowns more established forms of journalism so where can we look for reliable verifiable sources of news and information what does all this mean for democracy and what will the future hold reflecting on his twenty years as editor of the guardian at a time of unprecedented digital disruption and his experience of breaking some of the most significant news stories of our time alan rusbridger answers these questions and offers a stirring defence of why quality journalism matters now more than ever
