What Should the U.S. Army Learn From History? - Determining the Strategy of the Future through Understanding the Past 2017-09-19 this monograph examines the potential utility of history as a source of education and possible guidance for the u s army the author considers the worth in the claim that since history more accurately termed the past is all done and gone it can have no value for today as we try to look forward this point of view did not find much favor here the monograph argues that although history does not repeat itself in detail it certainly does so roughly in parallel circumstances of course much detail differs from one historical case to another but nonetheless there are commonly broad and possibly instructive parallels that can be drawn from virtually every period of history concerning most circumstances contents should the u s army learn from history understanding the past a foreign country persisting concerns and enduring hazards a familiar past parallels and analogies what changes and what does not what can the u s army learn from history recommendations for the u s army

Infrastructure Regulation: What Works, Why and How Do We Know? 2011-06-08 regulation of public infrastructure has been a topic of interest for more than a century providing public goods securing their financing maintenance and improving the efficiency of their delivery has generated a voluminous literature and series of debates more recently these issues have again become a central concern as new public management approaches have transformed the role of the state in the provision of public goods and the modalities by which the financing of infrastructure and its operation are procured yet despite the proliferation of new modalities of regulating infrastructure little is known about what works and why why do certain regulatory regimes fail and others succeed what regulatory designs and institutional features produce optimal outcomes and how and why do regulatory forms of governance when transplanted into different institutional contexts produce less than uniform outcomes this book addresses these questions exploring the theoretical foundations of regulation as well as a series of case studies drawn from the telecommunications electricity and water sectors it brings together distinguished scholars and expert practitioners to explore the practical problems of regulation regulatory design infrastructure operation and the implications for infrastructure provision contents regulating infrastructure a review of the issues problems and challenges ed araral darryl s l jarvis m ramesh wu xun problems issues and perspectives in regulation regulatory design and outcomes infrastructure regulation what works why and how do we know judith clifton daniel díaz fuentes marcos fernández Gutiérrez and julio revuelta does political accountability matter for infrastructure regulation the case of telecommunications farid gasmi paul noumba laura recuero virto entry relaxation and an independent regulator performance impact on the mobile telecoms industry in asia chalita srinuan pratompong srinuan erik bohlin electricity sector regulation governance risk regulation and governance institutional processes and regulatory risk in the thai energy sector darryl s l jarvis electricity tariff regulation in thailand analyses and applications of incentive regulation puree sirasoontorn regulating power without a five year plan institutional changes in the chinese power sector kun chin lin mika purra hui lin the indonesian electricity sector institutional transition regulatory capacity and outcomes mika purra regulating the independent power producers a comparative analysis of performance of andhra pradesh gujarat and tamil nadu in india rajendra kumar partial privatization and nested regulation institutional choices in public sector and regulatory reform sunil tankha the electricity industry reform in korea lessons for further liberalization junki kim kyuhyun kim water sector regulation governance regulatory independence and contract incompleteness assessing regulatory effectiveness in water privatization in manila xun wu loit batat nepomuceno a malaluan can regulation improve the performance of government controlled water utilities david ehrhardt nils janson effects of regulatory quality and political institutions on access to water and sanitation andrew b whitford helen smith anant mandawat the regulation of water infrastructure in italy origins and effects of an hybrid regulatory system alberto asquer measuring effectiveness of regulation across a river system a welfare approach alex coram lyle noakes private sector participation and regulatory reform in water supply the southern mediterranean experience edouard perard tempered responsiveness through regulatory negotiations in the water sector managing unanticipated innovations emerging from participation reforms boyd fuller sunil tankha readership students and academics studying and teaching urban and infrastructure policy public policy professionals and policy makers keywords infrastructure regulation asia electricity water public policy economic reformkey features brings together established and emerging experts on infrastructure regulationscontains comparative case studies from asia and other parts of the worldcovers a wide range of key infrastructure industries like telecommunications power and water

Of Heaven and its wonders, and of Hell, from what have been heard and seen. Translated from the original Latin, published in London 1758 1860

2019-04-08 what can we learn from the way artists live and operate in the world this is one of the questions that nietzsche asks himself throughout the course of his work although it is not one for which he is most famous in its answer the question functions as a swinging incessant movement that oscillates between a highly critical analysis of dogmas and prejudices of the western philosophical tradition and an equally profound recognition of how important it is for each of us to cling to a system of certainties and truths that are but illusions necessary to life art speaks to us of this perpetual transit from the brutality of the real to the enchantment of an invented world and teaches us how to move between both extremes beyond stereotypes and false myths the crucial nodes of nietzsche s thought are shown in a different light demonstrating once again the complexity of a philosophy that resists all simplifications

What We Should Learn From Artists 2022-07-26T00:00:00+02:00 the content of tests can be puzzling to students and teachers alike while a state test purports to measure the curriculum often the curriculum standards seem mysterious as well written in code or so general in meaning that it seems impossible for teachers to know if their instruction will adequately prepare their students charles fuhrken when he was a student struggling to concentrate on dreadfully boring passages of standardized reading tests charles fuhrken

remembers thinking to himself who writes this stuff he had no idea that one day it would be him fuhrken has spent years working as a writer for several major testing companies and he believes that what he s learned about testing could be very useful even liberating for teachers interested in teaching effective reading strategies as well as preparing students for reading tests in what every elementary teacher needs to know about reading tests charles takes the mystery out of reading tests he explains how reading tests are created how standards are interpreted and assessed and how students can apply their knowledge of reading to standardized tests what every elementary teacher needs to know about reading tests sets the record straight about the myths and realities of tests and offers extensive practical strategies that help students perform well on test day this ready to use easy to understand resource provides a wealth of information about reading tests including high quality preparation materials samples of the most frequently assessed reading standards and more than thirty engaging core reading activities tests require a special kind of savvy a kind of critical thinking and knowledge application that is not always a part of classroom reading experiences that s why teachers need to provide students with sound specific information about reading tests only then can students feel prepared and confident on test day
