students master the skills needed to diagnose and resolve customer concerns correctly on the first attempt students will gain an understanding of current diagnostic tools and advanced performance systems as they prepare to service the engines of tomorrow as the combustion engine looks set to remain the dominant energy conversion unit in vehicle powertrains in the medium term either in combination with electrical components or on its own attention will need to be paid to continue improving its efficiency in the future the high development depth of today s combustion engines means that it is becoming increasingly difficult to achieve significant efficiency improvements by simple means on the search for these improvements the focus has shifted to inner engine processes for instance charge cycles including the charging system the mixture formation including injection combustion and kinematic conversion of the energy within the fuel our 2nd conference engine processes aims to offer all developers a platform to discuss the latest technological developments in the field of inner engine process control and encourage new paths to be taken we believe that the program for this conference is a sound foundation for this endeavour da der verbrennungsmotor auch mittelfristig die dominierende energiewandlungseinheit im antriebsstrang von

kraftfahrzeugen sein wird entweder im verbund mit elektrischen komponenten oder aber als alleiniger antrieb muss der verbesserung von dessen wirkungsgrad auch in zukunft erhebliche aufmerksamkeit zu teil werden aufgrund der hohen entwicklungstiefe die heutige verbrennungsmotoren aufweisen wird es immer schwerer deutliche wirkungsgradverbesserungen auf einfachem weg zu erreichen auf der suche nach diesen verbesserungen rücken die innermotorischen prozesse immer mehr in den fokus hierzu zählen der ladungswechsel inkl aufladesystem die gemischbildung inkl einspritzung die verbrennung sowie die
