our summary is short simple and pragmatic it allows you to have the essential ideas of a big book in less than 30 minutes by reading this summary you will discover why most american companies can be considered dictatorships but also how to remedy this you will also discover how the market economy was developed along with the democratic notions of freedom and equality how this economy was designed to work with a majority of individual entrepreneurs how the explosion of wage labour following the industrial revolution undermined these ideals that the corporation now exercises a dictatorial type of power over the employees at least in the united states what alternatives make it possible to combine market economy and individual liberties elizabeth anderson teaches philosophy at the prestigious princeton university where she focuses on social issues and the challenge of equality her book transcribes two lectures given in 2015 and presents the originality of then giving a voice to her opponents in order to nourish her own reflection his deliberately provocative remarks revolve around two main ideas on the one hand anderson observes that the market designed to be liberating is today proving to be a source of oppression for many employees the company functions like a private government which constrains them in a way they would not tolerate from a democratic state on the other hand she points out that this issue is largely underestimated even denied in political and academic discourse buy now the summary of this book for the modest price of a cup of coffee

why our workplaces are authoritarian private governments and why we can't see it one in four american workers says their workplace is a dictatorship yet that number almost certainly would be higher if we recognized employers for what they are private governments with sweeping authoritarian power over our lives many employers minutely regulate workers speech clothing and manners on the job and employers often extend their authority to the off duty lives of workers who can be fired for their political speech recreational activities diet and almost anything else employers care to govern in this compelling book elizabeth anderson examines why despite all this we continue to talk as if free markets make workers free and she proposes a better way to think about the workplace opening up space for discovering how workers can enjoy real freedom

in simple action theory when people choose between courses of action they know what the outcome will be when an individual is making a choice against nature such as switching on a light that assumption may hold true but in strategic interaction outcomes indeterminacy is pervasive and often intractable whether one is choosing for oneself or making a choice about a policy matter it is usually possible only to make a guess about the outcome one based on anticipating what other actors will do in this book russell hardin asserts in his characteristically clear and uncompromising prose indeterminacy in contexts of strategic interaction is an issue that is constantly swept under the rug because it is often disruptive to pristine social theory but the theory is fake the indeterminacy is real in the course of the book hardin thus outlines the various ways in which theorists from hobbes to rawls have gone wrong in denying or ignoring indeterminacy and suggests how social theories would be enhanced and how certain problems could be resolved effectively or successfully if they assumed from the beginning that indeterminacy was the normal state of affairs not the exception representing a bold challenge to widely held theoretical assumptions and habits of thought indeterminacy and society will be debated across a range of fields including politics law philosophy economics and business management

we live in a simulation created by god everything is about the golden rule is one of a series of books that leverage prophecy and the notion that this universe is a simulation to achieve a better understanding of judeo christian islamic scripture this particular book attempts to dismantle the unearned notion that physics is inconsistent with judeo christian islamic scripture and monotheistic tenets of hinduism and buddhism like karma and reincarnation more particularly this book references things like the inability of any particle in the universe to move faster than the speed of light the fact that dark matter and dark energy don t actually exist and the illusory quality of quantum particles as well as a little bit of biochemistry and some very basic math to demonstrate that the data set comprised by the universe is more consistent with the notion of humanity comprising ai perceiving through avatars within a simulation programmed by supreme intellect than the notion of the accidental creation of the self reflective living human machine by unguided natural selection alone this book will also discuss some of the manmade commandments ultimately authored by the pope of the roman catholic church that have helped to divide the religion of abraham in opposing manmade religions and led to the abandonment of many of the commandments of our creator memorialized by moses and championed by both jesus christ and muhammad and to a widespread rejection of the golden rule though the rule was taught by all three prophets

in this profound and yet accessible book john kekes discusses moral wisdom a virtue essential to living a morally good and personally satisfying life he advances a broad nontechnical argument that considers the adversities inherent in the human condition and assists in the achievement of good lives the possession of moral wisdom kekes asserts is a matter of degree more of it makes lives better less makes them worse exactly what is moral wisdom however and how should it be sought

ancient greek and medieval christian philosophers were centrally concerned with it by contrast modern western sensibility doubts the existence of a moral order in reality and because we doubt it and have developed no alternatives we have grown dubious about the traditional idea of wisdom kekes returns to the classical greek sources of western philosophy to argue for the contemporary significance of moral wisdom he develops a proposal that is eudaimonistic secular anthropocentric pluralistic individualistic and agonistic he understands moral wisdom as focusing on the human effort to create many different forms of good lives although the approach is aristotelian the author concentrates on formulating and defending a contemporary moral ideal the importance of this ideal he shows lies in increasing our ability to cope with life s adversities by improving our judgment in chapters on moral imagination self knowledge and moral depth kekes calls attention to aspects of our inner life that have been neglected because of our cultural inattention to moral wisdom he discusses these inner processes through the tragedies of sophocles which can inspire us with their enduring moral significance and help us to understand the importance of moral wisdom to living a good life

when jesus departed to be with his eternal father he gave the church the ecclesia a clear mission statement in matthew 28 which speaks of the great commission and what is the great commission therefore the mission go and make disciples so that the world may be told of jesus and therefore be saved some will say some translations never speak of making disciples but rather to teach all nations baptizing them in the name of the father and of the son and of the holy ghost but is the purpose of teaching the nations of christ not to make disciples if one teaches someone about jesus you are surely equipping them to be a follower of jesus and such a follower is a disciple we are called in god s wisdom and by his spirit to teach all people about jesus for the purpose of making disciples it doesn t happen automatically it will take a concerted and decisive effort of the bride of god time is however slipping away to get our house in order with god and now is the time to do so we are living in the last days and the day of the lord s coming is at hand billions of people are still lost in every city town and village across the world there is no more time to be playing church or to be consumed with our agendas we need to come into alignment with god seek him and be awake from our slumber the church has been slumbering for a long time lulled into sleep by a false sense of security peace and a sense of accomplishment yet there is a mission to complete which is the great commission it is god s mission of bringing in the harvest of the lost and broken now is the time to get busy with god s business and his business is about salvation redemption and restoration the call to the church to actively engage in this mission therefore to make the main thing the main thing is covered in volumes one and two
