

Download free Mental retardation and sterilization a problem of competency and paternalism (PDF)

1 this book is the product of a one year project conducted by the hastings center institute of society ethics and the life sciences during 1976 1977 the behavior control research group an ongoing interdisciplinary working group composed of philosophers psychiatrists psychologists social scientists and lawyers met four times over the course of the year with special consultants with expertise in the field of mental retardation at those meetings participants gave in formal presentations which were followed by group discussion as the project progressed formal papers were delivered and subjected to further critical commentary this volume in two related parts represents the deliberations of the group as a whole and then offers individual papers prepared by some scholars in order to give a sense of the kind of specific arguments on which the general conclusions were based we undertook the project to examine 1 questions of competence and consent and 2 the practical implications of the project entitled ethical issues in the care and treatment of the mildly mentally retarded was supported by the evi5t program of the national science foundation under grant no 05576 14793 any opinions findings conclusions or recommendations expressed herein are those of the authors and do not necessarily reflect the views of the national science foundation ix x preface in terms of care and treatment that evolve from differing definitions and models applied to mental retardation antisepsis disinfection and sterilization types action and resistance by gerald e mcconnell is a detailed and accessible presentation of the current methods of microbial control each major category such as physical disinfection methods is given a chapter in which theory spectrum of activity advantages disadvantages and modes of action of the methods are thoroughly and clearly presented sufficient background on the life cycles and general anatomy of microorganisms is provided so that the reader who is new to microbiology will better appreciate how physical and chemical biocides work their magic on microbes other topics in the book include evaluating the efficacy of chemical antiseptics and disinfectants and of physical methods of microbial control and sterilization understanding how to choose the proper biocidal product and process for specific applications classic physical and chemical disinfection methods such as heat cold non ionizing radiation acids oxidizing agents and metals newer chemical disinfectants including isothiazolones micro and nano particles and bacteriophages as control agents antisepsis of skin and wounds and the biocides that can be used as antiseptics classic methods of physical sterilization such as moist heat and dry heat sterilization ionizing radiation and filtration along with newer methods including the use of plasma or pulsed light chemical sterilization methods that use ethylene oxide formaldehyde or a variety of other oxidizing agents a detailed look at the modes of action of biocides in controlling microbial growth and disrupting microbial physiology mechanisms that microorganisms use to resist the effects of biocides the second edition of antisepsis disinfection and sterilization types action and resistance is well suited as a textbook and is outstanding as a reference book for facilities managers and application engineers in manufacturing plants hospitals and food production facilities it is also essential for public health officials healthcare professionals and infection control practitioners abortion and sterilization medical and social aspects investigates the medical and social aspects of abortion and sterilization its aim is to legitimate abortion and sterilization for the sake of those who need and seek the service the best techniques are presented in the proper medical perspective

the social and political history epidemiology and public health aspects of abortion and sterilization are also discussed comprised of 23 chapters this book begins with a review of abortion legislation and practices in historical perspective amidst changing sociocultural contexts in diverse geographic areas liberalization trends are surveyed chronologically in terms of selected highlights demonstrating legislative progress and frustrations along with advances in abortion technology a classified listing of abortion statutes and or court decisions in 140 countries is given subsequent chapters deal with the epidemiology of induced abortion abortions for teenagers the link between abortion and mental health and hysterotomy and hysterectomy as abortion techniques vasectomy as a family planning option is also examined this monograph is intended for students teachers clinicians research workers administrative and nursing personnel and those with interest in reproductive control the new edition of this established and highly respected text is the definitive reference in its field it details methods for the elimination or prevention control of microbial growth and features new chapters on bioterrorism and community healthcare new chapters on microbicide regulations in the eu usa and canada latest material on microbial resistance to microbicides updated material on new and emerging technologies focusing on special problems in hospitals dentistry and pharmaceutical practice practical advice on problems of disinfection and antiseptics in healthcare a systematic review of sterilization methods with uses and advantages outlined for each evaluation of disinfectants and their mechanisms of action with respect to current regulations the differences between european and north american regulations are highlighted throughout making this a truly global work ideal for worldwide healthcare professionals working in infectious diseases and infection control 1 this book is the product of a one year project conducted by the hastings center institute of society ethics and the life sciences during 1976 1977 the behavior control research group an ongoing interdisciplinary working group composed of philosophers psychiatrists psychologists social sci entists and lawyers met four times over the course of the year with special consultants with expertise in the field of mental retardation at those meetings participants gave in formal presentations which were followed by group discus sion as the project progressed formal papers were delivered and subjected to further critical commentary this volume in two related parts represents the deliberations of the group as a whole and then offers individual papers prepared by some scholars in order to give a sense of the kind of specific arguments on which the general conclusions were based we undertook the project to examine 1 questions of competence and consent and 2 the practical implications lthe project entitled ethical issues in the care and treatment of the mildly mentally retarded was supported by the evi5t program of the national science foundation under grant no 05576 14793 any opinions findings conclusions or recommendations expressed herein are those of the authors and do not necessarily reflect the views of the national science foundation ix x preface in terms of care and treatment that evolve from differing definitions and models applied to mental retardation highly respected established text a definitive reference in its field covering in detail many methods of the elimination or prevention of microbial growth highly recommended to hospital and research personnel especially to clinical microbiologists infectioncontrol and environmental safety specialists pharmacists and dieticians new england journal of medicine why buy this book completely revised and updated to reflect the rapid pace of change in this area updated material on new and emerging technologies focusing on special problems in hospitals dentistry and pharmaceutical practice gives practical advise on problems of disinfection and antiseptics in hospitals discusses increasing problems of natural and acquired resistance to antibiotics new contributors give a fresh approach to the subject and ensure international coverage systematic review of sterilization methods with uses and advantages outlined for each evaluation of disinfectants and their mechanisms of action ebony is the flagship magazine of johnson publishing founded in 1945 by john h johnson it still maintains the highest global circulation of

any african american focused magazine this new edition is a comprehensive practical reference on contemporary methods of disinfection sterilization and preservation and their medical surgical and public health applications new topics covered include recently identified pathogens microbial biofilms use of antibiotics as antiseptics synergism between chemical microbicides pulsed light sterilization of pharmaceuticals and new methods for medical waste management midwest the author ends by shedding light on the practical and ethical difficulties of distinguishing coercion from choice in reproductive health policy what does informed consent in birth control really mean on the ground whose needs are actually served in attempts to reduce fertility rates according to dowbiggin the twentieth century birth control movement never entirely shed its eugenic origins book jacket focusing on how the radiation process works and how it is applied in sterilizing medical devices and healthcare products radiation sterilization for health care products covers recent developments in radiation technology such as e beams gamma rays and x rays the author discusses the design and operation of irradiators as well as factors that affect cost and efficiency he offers readers practical insights on this critical step in healthcare product manufacturing its current uses and its related cost concerns authoritative and comprehensive the book brings together information scattered throughout the literature into one convenient resource it incorporates the changes that have occurred in endodontic theory and practice in terms of materials concepts and protocols the presentation of the concepts and techniques has also been revised prepare for national certification local or state exams or course review with mosby s dental assisting exam review 4th edition based on the content in the certified dental assistant cda examination administered by the dental assisting national board danb the book provides a comprehensive review of general chairside assisting radiation health and safety and infection control on the evolve website a test generator lets you practice taking timed simulated exams with randomized questions in total this resource includes 3 000 multiple choice questions between the print book and evolve site that s nearly 10 times the number of questions on the actual cda exam 3 000 total multiple choice questions are provided between the print book and the evolve website all modeled after the questions in the certified dental assistant cda examination and include answers and rationales three print practice tests are included in the mosby s dental assisting exam review text and have the same number and type of questions you can expect to see in the general chairside infection control and radiation health and safety component exams evolve website includes the equivalent of more than six additional cda style exams and allows you to answer questions in practice and exam modes test generator on evolve allows you to create an unlimited number of unique cda exam style practice tests while in exam mode giving you test taking experience in a realistic online environment and provides feedback after completion of the exam clock functionality on evolve includes a test timer allowing you to practice cda exam time management state by state expanded functions questions are included on evolve providing preparation for the board exam in any state new 200 additional multiple choice questions provide even more exam preparation new updated full color photos and illustrations help explain difficult concepts revised content review sections include the latest concepts in general chairside assisting radiation health and safety and infection control capturing the essence of healthy living this book provides practical applications and personal strategies along with concepts grounded in scientific research to achieve a balance between science and the real world topics backed by research including a chapter devoted to violence provide students with an overview of today s health issues

Mental Retardation and Sterilization 2012-11-25

1 this book is the product of a one year project conducted by the hastings center institute of society ethics and the life sciences during 1976 1977 the behavior control research group an ongoing interdisciplinary working group composed of philosophers psychiatrists psychologists social scientists and lawyers met four times over the course of the year with special consultants with expertise in the field of mental retardation at those meetings participants gave in formal presentations which were followed by group discussion as the project progressed formal papers were delivered and subjected to further critical commentary this volume in two related parts represents the deliberations of the group as a whole and then offers individual papers prepared by some scholars in order to give a sense of the kind of specific arguments on which the general conclusions were based we undertook the project to examine 1 questions of competence and consent and 2 the practical implications the project entitled ethical issues in the care and treatment of the mildly mentally retarded was supported by the evi5t program of the national science foundation under grant no 05576 14793 any opinions findings conclusions or recommendations expressed herein are those of the authors and do not necessarily reflect the views of the national science foundation ix x preface in terms of care and treatment that evolve from differing definitions and models applied to mental retardation

Antisepsis, Disinfection, and Sterilization 2020-07-10

antisepsis disinfection and sterilization types action and resistance by gerald e mcdonnell is a detailed and accessible presentation of the current methods of microbial control each major category such as physical disinfection methods is given a chapter in which theory spectrum of activity advantages disadvantages and modes of action of the methods are thoroughly and clearly presented sufficient background on the life cycles and general anatomy of microorganisms is provided so that the reader who is new to microbiology will better appreciate how physical and chemical biocides work their magic on microbes other topics in the book include evaluating the efficacy of chemical antiseptics and disinfectants and of physical methods of microbial control and sterilization understanding how to choose the proper biocidal product and process for specific applications classic physical and chemical disinfection methods such as heat cold non ionizing radiation acids oxidizing agents and metals newer chemical disinfectants including isothiazolones micro and nano particles and bacteriophages as control agents antisepsis of skin and wounds and the biocides that can be used as antiseptics classic methods of physical sterilization such as moist heat and dry heat sterilization ionizing radiation and filtration along with newer methods including the use of plasma or pulsed light chemical sterilization methods that use ethylene oxide formaldehyde or a variety of other oxidizing agents a detailed look at the modes of action of biocides in controlling microbial growth and disrupting microbial physiology mechanisms that microorganisms use to resist the effects of biocides the second edition of antisepsis disinfection and sterilization types action and resistance is well suited as a textbook and is outstanding as a reference book for facilities managers and application engineers in manufacturing plants hospitals and food production facilities it is also essential for public health officials healthcare professionals and infection control practitioners

Abortion and Sterilization *2014-05-12*

abortion and sterilization medical and social aspects investigates the medical and social aspects of abortion and sterilization its aim is to legitimate abortion and sterilization for the sake of those who need and seek the service the best techniques are presented in the proper medical perspective the social and political history epidemiology and public health aspects of abortion and sterilization are also discussed comprised of 23 chapters this book begins with a review of abortion legislation and practices in historical perspective amidst changing sociocultural contexts in diverse geographic areas liberalization trends are surveyed chronologically in terms of selected highlights demonstrating legislative progress and frustrations along with advances in abortion technology a classified listing of abortion statutes and or court decisions in 140 countries is given subsequent chapters deal with the epidemiology of induced abortion abortions for teenagers the link between abortion and mental health and hysterotomy and hysterectomy as abortion techniques vasectomy as a family planning option is also examined this monograph is intended for students teachers clinicians research workers administrative and nursing personnel and those with interest in reproductive control

Russell, Hugo and Ayliffe's Principles and Practice of Disinfection, Preservation and Sterilization

2013-02-18

the new edition of this established and highly respected text is the definitive reference in its field it details methods for the elimination or prevention control of microbial growth and features new chapters on bioterrorism and community healthcare new chapters on microbicide regulations in the eu usa and canada latest material on microbial resistance to microbicides updated material on new and emerging technologies focusing on special problems in hospitals dentistry and pharmaceutical practice practical advice on problems of disinfection and antiseptics in healthcare a systematic review of sterilization methods with uses and advantages outlined for each evaluation of disinfectants and their mechanisms of action with respect to current regulations the differences between european and north american regulations are highlighted throughout making this a truly global work ideal for worldwide healthcare professionals working in infectious diseases and infection control

Mental Retardation and Sterilization *2013-03-13*

1 this book is the product of a one year project conducted by the hastings center institute of society ethics and the life sciences during 1976 1977 the behavior control research group an ongoing interdisciplinary working group composed of philosophers psychiatrists psychologists social scientists and lawyers met four times over the course of the year with special consultants with expertise in the field of mental retardation at those meetings participants gave in formal

presentations which were followed by group discussion as the project progressed formal papers were delivered and subjected to further critical commentary this volume in two related parts represents the deliberations of the group as a whole and then offers individual papers prepared by some scholars in order to give a sense of the kind of specific arguments on which the general conclusions were based we undertook the project to examine 1 questions of competence and consent and 2 the practical implications lthe project entitled ethical issues in the care and treatment of the mildly mentally retarded was supported by the evi5t program of the national science foundation under grant no 05576 14793 any opinions findings conclusions or recommendations expressed herein are those of the authors and do not necessarily reflect the views of the national science foundation ix x preface in terms of care and treatment that evolve from differing definitions and models applied to mental retardation

Russell, Hugo & Ayliffe's Principles and Practice of Disinfection, Preservation and Sterilization 2008-04-15

highly respected established text a definitive reference in its field covering in detail many methods of the elimination or prevention of microbial growth highly recommended to hospital and research personnel especially to clinical microbiologists infectioncontrol and environmental safety specialists pharmacists and dieticians new england journal of medicine why buy this book completely revised and updated to reflect the rapid pace of change in this area updated material on new and emerging technologies focusing on special problems in hospitals dentistry and pharmaceutical practice gives practical advise on problems of disinfection and antiseptics in hospitals discusses increasing problems of natural and acquired resistance to antibiotics new contributors give a fresh approach to the subject and ensure international coverage systematic review of sterilization methods with uses and advantages outlined for each evaluation of disinfectants and their mechanisms of action

Ebony 1973-10

ebony is the flagship magazine of johnson publishing founded in 1945 by john h johnson it still maintains the highest global circulation of any african american focused magazine

Disinfection, Sterilization, and Preservation 2001-01-01

this new edition is a comprehensive practical reference on contemporary methods of disinfection sterlization and preservation and their medical surgical and public health applications new topics covered include recently identified pathogens microbial biofilms use of antibiotics as antiseptics synergism between chemical microbicides pulsed light sterilization of pharmaceuticals and new methods for medical waste management midwest

The Sterilization Movement and Global Fertility in the Twentieth Century 2008

the author ends by shedding light on the practical and ethical difficulties of distinguishing coercion from choice in reproductive health policy what does informed consent in birth control really mean on the ground whose needs are actually served in attempts to reduce fertility rates according to dowbiggin the twentieth century birth control movement never entirely shed its eugenic origins book jacket

Surgical Sterilization in the United States 1998

focusing on how the radiation process works and how it is applied in sterilizing medical devices and healthcare products radiation sterilization for health care products covers recent developments in radiation technology such as e beams gamma rays and x rays the author discusses the design and operation of irradiators as well as factors that affect cost and efficiency he offers readers practical insights on this critical step in healthcare product manufacturing its current uses and its related cost concerns authoritative and comprehensive the book brings together information scattered throughout the literature into one convenient resource

Radiation Sterilization for Health Care Products 2001-09-26

it incorporates the changes that have occurred in endodontic theory and practice in terms of materials concepts and protocols the presentation of the concepts and techniques has also been revised

Forced Abortion and Sterilization in China 1998

prepare for national certification local or state exams or course review with mosby's dental assisting exam review 4th edition based on the content in the certified dental assistant cda examination administered by the dental assisting national board danb the book provides a comprehensive review of general chairside assisting radiation health and safety and infection control on the evolve website a test generator lets you practice taking timed simulated exams with randomized questions in total this resource includes 3 000 multiple choice questions between the print book and evolve site that's nearly 10 times the number of questions on the actual cda exam 3 000 total multiple choice questions are provided between the print book and the evolve website all modeled after the questions in the certified dental assistant cda examination and include answers and rationales three print practice tests are included in the mosby's dental assisting exam review text and have the same number and type of questions you can expect to see in the general chairside infection control and radiation health and safety component exams evolve website includes the equivalent of more than six additional cda style exams and allows you to answer questions in practice and exam modes test generator on evolve allows you to create an unlimited number of unique cda exam style practice tests while in exam mode

giving you test taking experience in a realistic online environment and provides feedback after completion of the exam clock functionality on evolve includes a test timer allowing you to practice cda exam time management state by state expanded functions questions are included on evolve providing preparation for the board exam in any state new 200 additional multiple choice questions provide even more exam preparation new updated full color photos and illustrations help explain difficult concepts revised content review sections include the latest concepts in general chairside assisting radiation health and safety and infection control
