The Future of European Property Law 2012-05-29 european integration has a growing impact on the property law systems of the eu member states the tensions which can be seen are considerably greater than in other areas of private law given the technically complex and mandatory nature of property law in this book current developments in european property law particularly the draft common frame of reference are analysed and evaluated focussing on secured transactions and mortgage law with contributions by academic and practicing lawyers containing transfer of ownership and good faith acquisition the rules in the member states and in book viii of the dcftr secured transactions and the dcftr registration of intellectual property rights trusts from a common and a civil lawyer s perspective the border area between property law and contract law securities

The Principle of Numerus Clausus in European Property Law 2008 in order to develop a framework that can form a basis for the development of a european property law this book provides a comparative analysis of property law from the perspective of four european legal systems and european law focusing on the numerus clausus principle the book offers theoretical insights on how substantive property law european law and to a certain extent private international law intersect the principle of numerus clausus one of the fundamental principles of property law is adhered to by most legal systems in this book an analysis of the property law systems of france germany the netherlands and england is provided a description is given of the content of available property rights in each of these systems followed by an examination as to whether these rights form a closed system and whether private parties are given freedom to shape property rights or even create new types of rights in the last decades property law has come under pressure to allow more party autonomy in other words property law has become more and more subject to pressure from contract law private parties attempt to draft their contracts in such a way that their contractual arrangements are given property effect sometimes they also attempt to make use of a property right in a way that was not foreseen by legislature or courts as a result rights have come into existence that are intermediary between the law of contract and the law of property moreover the systems of property law are also subject to a growing influence from european legislation the development of the internal market in the european union increasingly forces member states to answer the question whether and if the answer is affirmative in what way property rights created in another member state should be recognized substantive property law intersects here until now national legal systems generally resist this influence of european law and use the principle of numerous clausus as a justification it is to be questioned whether the numerus clausus principle can still act as a guardian against the influence of foreign

and european law

Foundations of Property Law 2023-08-25 foundations of property law things as objects of property rights is an abridged translation of the first volume of christian von bar s gemeineuropäisches sachenrecht a milestone in european private law theory and in comparative property law more broadly radical in content and scope the english version examines the dynamics of interaction between the objects contents and holders of property the conceptual framework of property law is presented as a domain of erga omnes monopoly rights that govern the relationship

between persons and objects of value within that framework a reciprocal relationship is illustrated between property rights and their objects property rights play a role in constituting the very objects things in which they are held with comprehensive comparative analysis insights are gleaned from all the jurisdictions of the european union and the united kingdom presenting a critical evaluation of property law systems in both common and civil law traditions this book joins all the national legal systems in a single inquiry treating their traditions and arguments with the respect they deserve and taking advantage of the knowledge embodied in the diversity of european private law a scholastic work offering deep and unique insights into the european property law systems foundations of property law will quickly become a go to resource for anyone interested in european private law and comparative property law

Divergences of Property Law 2006 this work is inspired by the comparative study published in the interaction of contract law and tort and property law in europe isbn 3 935808 20 8 cloth 79 00 2004 out of a transnational comparative and eu oriented perspective the essays included discuss whether divergences of property law on contractual security rights in movables constitute an obstacle to the internal market and if so what solutions could be offered unification or harmonization of private international law cannot offer an adequate solution while unification of domestic security laws could however the latter will take a very long time partly due to the specific nature of property law the contributing authors advocate the development of a european security right in movables esrm in addition to the respective contemporary national security rights a real esrm would clearly support free competition within the european union however the development of an esrm will take much time in particular when dealing with the relation between that esrm and domestic security rights in the member states the reader will also find considerations on the contents of an esrm and on the outlines of the required additional provisions

Common Principles of European Intellectual Property Law 2012

intellectual property law has been harmonized by eu law to a considerable extent at the same time intellectual property rights have converged the academic discussion has not kept pace with this development european intellectual property law is often seen through the spectacles of national law pan european discussions about issues of community law seem to be the exception rather than the rule the contributors to this volume investigate if and to what extent european rules and principles applicable to all intellectual property rights already exist or whether they can be found on the basis of the *acquis communautaire* and comparative law in particular they discuss the merits and the methodology of common principles before turning to several areas of substantive intellectual property law such as grounds of protection secondary liability and exceptions to enforcement and finally to the relationship between intellectual property and neighbouring areas of eu law

EU IP Law 2015 the aim of this short introduction to european intellectual property ip law is to provide students who have little or no prior knowledge of european ip with an overview of this field of law from a truly and entirely european perspective this book makes an attempt to explain the basics of intellectual property law with references to the european and the important international treaties it is intended as a first introduction for students who are following a basic course in eu ip law as part of a broader introduction to european law or european private law

Intellectual Property Law and Human Rights 2020-06-08 intellectual property law and human rights fourth edition edited by paul l c torremans once regarded as a niche topic the nexus of intellectual property and human rights now lies in the eye of the storm that is today's global economy in this expanded new edition of the pre eminent work in this crucial area of legal theory and practice with nine completely new chapters well known authorities in both intellectual property law and human rights law present an in depth analysis and discussion of essential and emerging issues in the convergence of intellectual property law and human rights law the fourth edition is fully updated to address current matters as diverse as artificial intelligence climate change and biotechnological materials all centred on the relations between intellectual property and freedom of expression and the fundamental right to privacy in an intellectual property environment the contributors address such topics as the following and more the status of copyright as a fundamental right fair use transformative use and the us first amendment intellectual property in the jurisprudence of the european court of human rights freedom to receive and impart information under the eu charter of fundamental rights how to mitigate the risks

article 17 of directive 2019 970 poses to freedom of expression fair dealing defences algorithmic copyright enforcement and free speech developing a right to privacy for corporations expanding the role of morality and public policy in european patent law and ethical and religious concerns over patenting biotechnological inventions as human rights issues continue to arise in an intellectual property context practitioners academics and policymakers in both fields will continue to recognize and use this well established cornerstone work in the debate as a springboard to the future development of the ever more prominent interface of intellectual property and human rights

Propertizing European Copyright 2018 with an acceleration in the last decades the language of property piracy and theft has become mainstream in copyright matters scholars have argued that this latent propertization has progressively led to the undue expansion of copyright and an enclosure of knowledge causing clashes with users fundamental rights and eu social and cultural policies challenging the validity of such critiques propertizing european copyright demonstrates that these distortive effects are only the result of mishandled property rhetoric and that a commitment to copyright propertization could enable a more internally consistent and balanced development of eu copyright law

Transfer of Immovables in European Private Law 2017-05-25 this volume explores the law relating to the transfer of immovables in seventeen countries within europe

The Future of Family Property in Europe 2011 this book covers five areas of family property law in europe matrimonial property law in europe family contracts û issues of autonomy protection of older people in law freedom of testation and protection of family members and the unification of private international law these issues are discussed throughout the book together addressing the broad question what might be the future of family property law in europe

Party Autonomy in International Property Law 2011-06-30 party autonomy is a subject that is traditionally rejected in the field of property law legal systems throughout europe and most parts of the world still found their property law on the lex situs this point of view however is challenged more and more the immense intensification of worldwide trade may have turned boundaries between countries into barriers in a world that needs flexibility this book deals with important questions concerning this problem including what happens to property rights related to movables and claims when borders are crossed do we recognize a german retention of title or an american security right which law will apply the law of the country of origin the lex situs or the law of the country of destination how does legislation concerning financial instruments relate to the problem and what is it all worth in insolvency situations

Creating Property Rights 2012-04-19 the creation by government regulation of entitlements akin to property rights is a widespread phenomenon imposing a reconsideration of the traditional categories of public and private property the allocation of such rights that lack an explicit legislative definition but are object of relevant social and legal interests is a very complex topic which has become very acute in cases where markets have been established for them the analysis of the systems created for the allocation and management of these rights is the core of this book which examines four emblematic examples airport slots spectrum rights milk quotas and emission allowances the book focuses on the european level including legislation and the most relevant policy issues by means of a comparative method involving private law public law and law and economics approaches

Property Law and Human Rights 2001 this text contains an introduction to the provisions of the human rights act 1998 and an explanation of the convention jurisprudence it provides a detailed analysis of article 1 protocol no 1 and articles 6 8 and 14 all of which are likely to have an impact on english property law the relevant case law of the strasbourg institutions the european court of human rights and the commission is considered in depth and case summaries of the most important property related cases are provided in an appendix the book considers the impact of the human rights act on specific aspects of english property law and considers how some areas appear vulnerable to challenge under the act the book should be of use to both practitioners and academics by providing a comprehensive and easy to read guide to the impact of the human rights act on property law

Intellectual Property Law in the European Union 2005 developed initially as a textbook and sourcebook for lawstudents at a time when the teaching of intellectualproperty law was mostly absent in american law schools andthe teaching of eu intellectual property law was completelyignored in the curricula prof harris guides the reader through the gradual andincremental stages of consolidation of the idea ofintellectual property in the european common market

Sustainable Property Law 2022-04-22 the law of property provides the building blocks for our market economy and is a manifestation of our post french and american revolution thinking on how we want to organise ourselves that organisational structure has not always been fair or equal around the world european property law systems have been exported around the globe yet outside of europe things have been possible such as owning another person slavery or extracting wealth from land at all costs this was unthinkable on the european continent these differences have led to an increasingly unequal division of property between people countries and even continents some can extract a lot of wealth and pollute the planet from their property whilst others have nothing an

unsustainable use of the planet's resources where we live outside of our planetary boundaries is the result. This short book argues that this is not the way forward. Our law must be resilient in a transformative manner and European systems need to accept their role in how this has come to be based on that we need to rethink how we can reform our law of property so that it allows us to live within our planetary boundaries.

Cases, Materials and Text on Property Law 2012-07-23. This casebook presents a deep comparative analysis of property law systems in Europe: the law of immovables, movables and claims, offering signposts and stepping stones for the reader wishing to explore this fascinating area. The subject matter is explained with careful attention given to its history, foundations, thought patterns, underlying principles and basic concepts. The casebook focuses on uncovering differences and similarities between Europe's major legal systems: French, German, Dutch and English law are examined, while Austrian and Belgian law are also touched upon. The book combines excerpts from primary source materials, case law and legislation and from doctrine and soft law. In doing so, it presents a faithful picture of the systems concerned. Separate chapters deal with the various types of property rights, their creation, transfer and destruction, with security rights such as mortgages, pledges, retention of title, as well as with harmonising and unifying efforts at the EU and global level through the functional approach taken by the *Ius Commune* casebooks. This volume clearly demonstrates that traditional comparative insights no longer hold. The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely. Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground could be found. However, economic integration, in particular integration of financial markets and freedom of establishment, has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments, e.g. retention of title. This pressure towards integration has led comparative lawyers to refocus their interest from contract, tort and unjustified enrichment to property law and delve beneath its surface. This book reveals that today property law systems are closer to one another than previously assumed. That common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe.
