what explains eurozone member states divergent exposure to europe s sovereign debt crisis deviating from current fiscal and financial views from convergence to crisis focuses on labor markets in a narrative that distinguishes the winners from the losers in the euro crisis alison johnston argues that europe s monetary union was structured in a way that advantaged the corporatist labor markets of its northern economies in external trade and financial lending northern europe s distinct economic advantage lay not with its fiscal capabilities which were not that different from those of southern eurozone countries but with its wage setting institutions through highly coordinated collective bargaining the euro north persistently undercut the inflation performance of southern trading partners destining them to a perpetual cycle of competitive decline and external borrowing while northern europe s corporatist labor markets were always low inflation performers monetary union ultimately made their wage setting institutions toxic for the south the euro s institutional predecessor the european monetary system included economic and institutional mechanisms that facilitated macroeconomic adjustment and convergence between the common currency s corporatist and noncorporatist economies combining cross national statistical analysis with detailed qualitative case studies of denmark germany italy ireland the netherlands and spain johnston reveals that monetary union s removal of these mechanisms allowed external imbalances between these two blocs to grow unchecked underpinning the crisis in which europe currently finds itself rather than achieving the eu s goal of an ever closer union the common currency produced a monetary environment that destabilized the economic integration of its diverse labor markets

the thesis of this book is a terrifying one our present global civilisation will collapse within twenty years and it is too late to stop it we shall regress to a new middle ages akin to the fall of the roman empire only much more destructive for the first time in the whole of human history certain dramatic lines giant crises and catastrophes of immense proportions already tangible have emerged they are converging and will most likely reach their zenith by 2020 up to that time as we have already been witnessing their effects will continue to get worse until a breaking point is reached guillaume faye rigorously examines these escalating crises one by one environmental damage and climate change the breakdown of a speculative and debt ridden globalist economy the return of global epidemics the depletion of fossil fuels and of agricultural and fishing resources the rise of mass immigration terrorism and nuclear proliferation the worsening of the rupture between islam and the west and the dramatic explosion of a population of the elderly in the wealthy countries all of it leading to an unprecedented worldwide economic recession an increase in localised and possibly large scale armed conflicts and perhaps worse still faye reminds us we should not give in to pessimism what we are experiencing is not an apocalypse but a metamorphosis of humanity we might have reached the end of what the hindu traditions refer to as the kali yuga the age of iron marked by materialism and selfishness but those who survive the catastrophe and chaos will perhaps build a new and better humanity with a doctorate in political science from paris institute of political science the essayist guillaume faye was one of the principal theoreticians of the french nouvelle droite in the 1970s and 80s prior to his growing sympathy for the identitarian movement he has also been a journalist at figaro magazine paris match magazine hebdo valeurs actuelles and a radio commentator for several years he was the editor of j ai tout compris i understood everything a private newsletter

this is the first book to provide a full and dispassionate account of the politics and economics of the eurozone crisis focusing on the interlinked origins and impacts of the euro zone crisis and the policy responses to it the book is distinguished from existing research by its avoidance and rejection of the too often simplistic analysis that has characterized political media and regrettably some academic coverage and by its attempt to escape from the tyranny of day to day events and short term developments each of the contributors identifies an important question and undertakes a careful empirical theoretically informed analysis that produces novel perspectives together they seek to balance many of the existing accounts that have rushed to sometimes unwarranted conclusions concerning for example the locus of institutional power in european crisis management the power and centrality of particular member states notably germany which has been attributed with hegemonic status the supposed entrapment of eu policy makers by an austerity ideology and the deep flaws that apparently afflict the solutions to the crisis put painstakingly in place such as banking union while it will be some time before the eu can put the crisis behind it and the dust finally settles on the revised institutional system that emerges the political and economic dynamics of the eurozone crisis marks an important step towards a considered reflective analysis of the tumultuous events and developments of the crisis period

this volume challenges prevailing understanding of the two great founders of sociological thought in a detailed and systematic way the author demonstrates how marx and durkheim gradually developed the fundamental frameworks for sociological materialism and idealism while most recent interpreters of marx have placed alienation and subjectivity at the centre of his work professor alexander suggests that it was the later marx s very emphasis on alienation that allowed him to avoid conceptualizing subjectivity altogether in durkheim s case by contrast the author argues that such objectivist theorizing informed the early work alone and he demonstrates that in his later writings durkheim elaborated an idealist theory that used
