Intelligent Interactive Multimedia Systems and Services

2018-06-11

this volume presents a series of carefully selected papers on the theme of intelligent interactive multimedia systems and services iimss 18 but also including contributions on innovation in medicine and healthcare inmed 18 and smart transportation systems sts 18 the papers were presented at the smart digital futures 2018 multi theme conference which grouped the amsta idt inmed seel sts and iimss conferences in one venue in gold coast australia in june 2018 iimss 18 included sessions on cognitive systems and big data analytics data processing and secure systems innovative information services for advanced knowledge activity autonomous system and image processing inmed 18 papers cover major areas of digital architecture for internet of things big data cloud and mobile it in healthcare and advanced ict for medical and healthcare sts 18 papers provide a comprehensive overview of various aspects of current research into intelligent transportation technology

ArchiMate® 3.0.1 Specification

2017-09-28

the archimate specification an open group standard defines an open and independent modeling language for enterprise architecture that is supported by different tool vendors and consulting firms the archimate language enables enterprise architects to describe analyze and visualize the relationships among business domains in an unambiguous way this book is the official specification of the archimate 3 0 1 modeling language from the open group archimate 3 0 1 is a minor update to archimate 3 0 containing the set of corrections from archimate 3 0 technical corrigendum no 1 u172 this addresses inconsistencies and errors identified since the publication of version 3 0 in june 2016 the archimate specification supports modeling throughout the togaf architecture development method adm new features in version 3 include elements for modeling the enterprise at a strategic level such as capability resource and outcome it also includes support to model the physical world of materials and equipment furthermore the consistency and structure of the language have been improved definitions have been aligned with other standards and its usability has been enhanced in various other ways

the intended audience is threefold enterprise architecture practitioners such as architects e g business application information process infrastructure and obviously enterprise architects senior and operational management project leaders and anyone committed to work within the reference framework defined by the enterprise architecture those who intend to implement the archimate language in a software tool they will find a complete and detailed description of the language in this book the academic community on which we rely for amending and improving the language based on state of the art research results in the enterprise architecture field

The TOGAF® Standard, 10th Edition - Enterprise Agility and Digital Transformation

2022-04-24

this document is the enterprise agility and digital transformation togaf series guide set it contains two togaf series guides that have been developed and approved by the open group and is part of the togaf standard 10th edition togaf series guide enabling enterprise agility this document is designed to help enterprise architects requiring information on how to adapt and use the togaf framework to support an agile enterprise it covers the following topics an introduction to the topic including what is meant by agility the role of enterprise architecture and how it relates to agility the terms and definitions used in the document the togaf architecture development method adm and how that relates to agility how architecture activities can be structured to support agility how to execute enterprise architecture in an agile environment togaf series guide using the togaf standard in the digital enterprise this document is written those undertaking the roles of both enterprise architect and digital practitioner for digital practitioners it communicates what architecture practices would help to grow their digital enterprise and how to interact with the enterprise architecture community to get them for those undertaking an enterprise architect role it provides guidance on supporting the digital enterprise it covers the following topics a high level introduction to how established enterprise architecture practices bring value to digital enterprises at all scales how enterprise architecture and the togaf standard bring valuable tools to digital enterprises of all sizes alignment of terminology between the togaf standard and the digital practitioner body of knowledge applying enterprise architecture and the togaf standard to the contexts described in the dpbok standard

Encyclopedia of Information Science and Technology, Third Edition

2014-07-31

this 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology provided by publisher

BIAN Data Architecture & Design Specialist Courseware

2013-02-18

this is the official courseware for the accredited bian data architecture design specialist training it is intended for professionals that aim to pass the bian data architecture design specialist certification via the online exam the bian data architecture design specialist exam leads to the official bian data architecture design specialist certification by the banking industry architecture network it is carried out by van haren learning solutions the bian data architecture design specialist certification exam tests the training participant s knowledge of the bian data reference architecture for the financial industry by successfully passing the bian data architecture design specialist exam participants will achieve the bian data architecture design specialist level certification which assures they have been audited and have successfully mastered the required bian data architecture design specialist level the bian data architecture design specialist level includes the ability to describe the added value that the bian object model seeks to provide to the financial industry and its service providers it includes the knowledge and understanding of the general design principles and elements of bian s reference architecture for the financial industry but the main objective is to understand the underlying archimate and uml concepts used by bian to model the object model and to learn and apply the bian modeling patterns the bian certification exam is intended for professionals in the financial services industry such as data architects and data modelers at both enterprise and solution levels as well as consultants and service providers that operate in the financial services industry key benefits of the bian data architecture design specialist certification are it enables data professionals to leverage the benefits of bian and the

bian bom it increases the knowledge and general skills of professionals regarding the bian bom and control records and enables the creation of more transparent ict systems it provides professionals and their organizations with a competitive advantage it is a hallmark for the professionalism of banking professionals and banking architects who are active with data number of questions 60 duration minute of exam 60 min pass mark 70 open closed book closed language english paper based online availability online availability

Better Practices of Project Management Based on IPMA competences - 3rd revised edition

2016-11-22

for trainers free additional material of this book is available this can be found under the training material tab log in with your trainer account to access the material this revised edition is the first text book in english specially developed for training for ipma d and ipma c exams in this 3rd edition the text has been restructured to better align the content with the order of the competence elements in the icb version 3 divided into technical competences behavioral competences and contextual competences for this reason it has been improved as a study book for everyone studying for the ipma d and ipma c exams besides that it is a extremely rich source book for those project managers that have committed themselves to a lifelong professional development in addition the book had to be applicable to groups of project managers originating from diverse cultures for this reason this is not a book that tells how a westerner must behave in an arab or an asian country but one that looks at the different subjects covered in the icb as seen from diverse cultural standpoints each chapter is based on the same structure definitions introduction process steps process steps special topics text boxes additional to the main text give additional explanation to the main text an elaborate index of terms allows that this book can be used as the information source to all aspects of project management

Enterprise Information Systems and Advancing Business Solutions: Emerging Models

2008-04-19

this book is to provide comprehensive coverage and understanding of various enterprise information systems eis such as enterprise resource planning erp and electronic commerce ec and their implications on supply chain management and organizational competitiveness provided by publisher

Semantic Service Provisioning

2002-08

service oriented computing has recently gained extensive momentum in both industry and academia and major software vendors hook on to the service paradigm and tailor their software systems towards services in order to accommodate ever changing process and product requirements in today s dynamic market environments while dynamic binding of services at runtime was identified as a core functionality of service based environments as far back as 2000 its industrial strength implementation has yet to be achieved the main reason for this is the lack of rich service specifications concepts and tools to process them this book introduces advanced concepts in service provisioning and service engineering including semantic concepts dynamic discovery and composition and illustrates them in a concrete business use case scenario to prove the validity of the concepts and technologies a semantic service provisioning reference architecture framework as well as a prototypical implementation of its subsystems and a prototypical realization of a proper business scenario are presented thus the book goes way beyond current service based software technologies by providing a coherent and consistent set of technologies and systems functionality that realizes advanced concepts in service provisioning both the use case scenario and the provisioning platform have already been substantiated and implemented by the eu funded adaptive services grid project the book therefore presents state of the art research results that have already passed a real industrial implementation evaluation which is based on the work of over 20 european partners cooperating in the field of semantic service provisioning
