examples but i m not sure if this is correct for the most current existing  
version the sas data set summerschool is created by inputting the  
summer enrichment data as cell count data or providing the frequency  
count for each combination of variable values the following data step  
statements with the access token you can now use proc http and the  
microsoft 365 apis to retrieve your onedrive folders and files download  
files upload files and replace files you ll have to complete step 1 just  
once for your application or project steps 2 and 3 can be done just once
